There are five different buildings you need to build in every level. In order to complete a level and move to the next village, you need to update all the facilities in your current 5-star village. Building costs Update update And updates become progressively more expensive the further one gets in the game, so as to prepare for a grinding. Buildings have no special effects or functions and are simply indicators for your progress towards the next village. There are 252 villages, each with its unique theme, which can be completed to Coin Maestro.
