Customers who book motivational leadership and inspiring keynote speaker and best selling author Mark Sanborn benefit from a memorable, educational and motivational experience. Mark is the master of customizing every leadership keynote to the customer and situation. Customers who book motivational leadership and inspiring keynote speaker and best selling author Mark Sanborn benefit from a memorable, educational and motivational experience. Mark is the master of customizing every leadership keynote to the customer and situation. How to improve your How do you continue to improve when you are already the best? What happens when complacency or outdated thought stunts performance? Based on Mark's best sales book! Discover the secrets of extraordinary people who create added value for customers and colleagues without spending more money to do so! Like anyone, anywhere, can make a positive difference, as a leadership speaker, reveals how to develop a real leadership capacity. (Start by acknowledging that true leadership is not a title function). Three essential elements that will make you a successful leader today "The Intention Imperative" is a practical, tested and engaging presentation based on Mark's latest and best reflection. Thank you very much! You've exceeded my expectations! That's exactly what we needed as an organization! I look forward to working together again. Thanks. Thanks. Mark, it has been an absolute pleasure working with you on this event. You sent us all to laugh, but especially with some ideas on how to go from the best to the best! Thank you for the time you have in the presentation. All our participants appreciated both the content and delivery of the message. I know. I know. of them left yesterday with notes and elements of action that they will try to introduce and employ with their respective groups of contributors. It was nice to see how you managed to personalize your presentation. You hit the nail right in the head for us. Thanks again. Mark was thought provocative, genuine and funny. His ability to connect and inspire our organization was unique. He engaged our audience with his warmth and energy, but he kept our attention with his honest and practical intuitions provided with a refreshing authenticity. You're perfect! The best yet. Seriously. We're still talking about him. His message is one that will never age. We loved him! Super fun and very relevant. He also did a great job of customizing our company. What? I want to thank you once again for your presentation during our Powertrain exhibition last week. Your message was correct and even tailored to our industrial issues. I knew that you and your message would be well received by our group, and it is true. Great feedback continues to come with the main theme of being, is. We need to know more from Mark Sanborn. You've really exceeded our expectations. So thank you for making me look good Mark! I feel indebted to you. I am very grateful to you for a number of reasons, for being so complete (and a pleasure to work with) before the time, and even more for delivering this exceptional note key. I also had some great insights to keep in mind. Overall, your professionalism, flexibility, good mood and topic were perhaps the most suitable turn key to close my last LIM, and I am very grateful that things went as they did.
