This update is available for all users of Android devices. This update has its positive aspects, thanks to the new update, the new blocks, the dungeons and the MOBS will be added to the game. Take a more close look. What are the characteristics of Minecraft PE 1.1.0.4 Update? When releasing this version, the developers of the Mojang studio presented us with a version of Minecraft PE 1.1.0.4 with all its new features that all players from the world of Minecraft have really liked them. In all, in the new update, not only has been updated, but also a game guide, to which a new new creature has been added. One of the largest structures of Palazzo Boschivo has been added to the Bioma of the dark forest. In the new update of Minecraft 1.1.0.4, this place was full of treasures and hostile mobs. A large number of hazardous mobs make this place truly dangerous. Players who prefer to play hardcore or go back to find this place should be extremely attentive in this place. You will see this structure from afar, but don't forget that the inhabitants of this villa will not be happy to see you. In the building of the woods, you can meet a crowd so hostile like the Vindicator. Very aggressive and dangerous mobs. These mobs bring an ax with them and also know how to run. We sive that only a few mobs can sprint into the world of Minecraft. The second hostile crowd you can meet at Woodland Mansion is Evoker. This crowd is more slow but slightly stronger than the previous one. His main skill is magic. Furthermore, they have the ability to convene hostile mobs like VEX and Fangs. These are the mobs that will speak greatly with the player to go through this structure. Added to the dungeon, the new blocks have been added to Minecraft Pocket Edition 1.1.0.4, such as concrete, concrete, glazed terracotta, shulker box and packaged ice. The packed ice is a block that a player can enter some biomes. The player can cement powdered craftsmanship and concrete blocks without problems in any place available. All you need for this is gravel, water and sand. Lock as the terracotta has a very interesting and colored texture. PLAYERS can use the shulker box as a backpack. All items, materials or anything else that the player puts in after the destruction of the block will not fall. These are very useful blocks given that new mobs have been added to the game, one of which is blade. This is a neutral crowd that players can use to carry their articles. Objects.
