The family is often referred to as the 8xC196 family, or 80196, the most popular MCU in the family. These MCUs are commonly used in hard disk drives, modems, printers, pattern recognition and motor control. In 2007, Intel announced the discontinuance of the entire MCS96 family of microcontrollers. Differences between the 8061 and the 8096 include the memory interface bus, the 8061s MBus being a burstmode bus requiring a tracking program counter in the memory devices. The 8096 also had onchip program memory lacking in the 8061.

Parts in that family included the 8065, which incorporated a memory controller allowing it to address a megabyte of memory. The processors operate at 16, 20, 25, and 50 MHz, and is separated into 3 smaller families. Later the 8096, 8097, 8395, 8396, and 8397 were added to the family. The microchip is based on a 5 V, 3 micrometre, HMOS process. The microcontroller has an onchip ALU, 4 channel 10 bit analog to digital converter ADC, 8 bit pulse width modulator PWM, watchdog timer, 4 16bit software timers, hardware multiply and divide, and 8 KB of onchip ROM. The Backed Mirror Glass Assembly replacement line is vehicle specific, and there are many models supported. Using Parts Finder will ensure you find the right backed glass assembly mirror for your specific vehicle. Depending on your vehicle model, several Backed Glass Assembly replacement mirrors come with connectors for supporting heating features and turn signals. Auto dimming functionality is not supported. About Fit Systems Since 1950, as the leading manufacturer of vehicle mirrors, Fit Systems has been servicing the OE mirror industry and the replacement mirror aftermarket for over 60 years. Our car mirrors and truck mirrors can be found in numerous applications, and the Fit System name is one of the most recognizable brands on the market. Our diverse product line, which includes the automobile mirror, truck mirror, replacement glass and towing mirror segments, is manufactured under strict quality guidelines. We operate five factories worldwide that are ISO certified and follow QS 9000 standards. The Fit System, our OE replacement mirror program, covers over 2,700 vehicle applications and continues to grow. It is the largest program of its kind in the U. S. and Canada, and fulfills 87% of the aftermarket demand. We also manufacture universal mirrors for car, truck, SUV and van applications, as well as numerous interior and exterior accessories. Benefits and Advantages of Fit System's Backed Mirror Glass Assembly Economical Save over 50% of what you would have to pay if you went to the Dealer direct. Durable The quality of the back plate and mirror is top rated. Designed and manufactured to last for years of wear and tear. Easy to Install In a couple of minutes you can install and snap in our back plate. Simple installation instructions come with each unit. Professional installed look The elegant design of the mirror and the seating of the mirror on the back plate allows for a manufactured look and feel.

This cytokine is an important mediator of the inflammatory response, and is involved in a variety of cellular activities, including cell proliferation, differentiation, and apoptosis. Initially discovered as the major endogenous pyrogen, induces prostaglandin synthesis, neutrophil influx and activation, Tcell activation and cytokine production, Bcell activation and antibody production, and fibroblast proliferation and collagen production. Promotes Th17 differentiation of Tcells. Processing and secretion are temporarily associated. As these ester intermediates react with peroxide, they produce a strong and sustained chemiluminescent signal that can be captured by Xray film CCD imaging. The substrate also produces a robust fluorescent signal that can be captured with fluorescence imagers. Pierce ECL Plus Substrate enables the detection of lowpicogram amounts of target protein on nitrocellulose or PVDF membrane when probed with appropriate primary and secondary antibody concentrations. Its broad dynamic range, high sensitivity and longlasting signal make Pierce ECL Plus Substrate an excellent choice for western blot analysis. Not for use in diagnostic procedures.
