The company sells a large range of vehicles, including commercial and luxury cars. Ford is currently the secondlargest U.S.-based automaker and the fifth largest in the world. In 2008 alone, Ford produced more than 5.5 million automobiles and employed more than 200,000 employees at 90 plants worldwide. Written by experts with hands-on experience, our extensive selection of Ford repair manuals will help you to fully service your vehicle, as well as rebuild from the ground up. Haynes manuals provide you with all the practical tips, photos, and step-by-step explanations you need to get the job done. The current line of the Ford Ranger was introduced in 1982 for the 1983 model year. The compact Ranger was styled after the full-size Ford pickups, and is also offered with a four-wheel drive option. For the models sold internationally, see Ford Ranger international. Introduced in early 1982 for the 1983 model year, the Ranger is currently in its fourth generation. Developed as a replacement for the Mazda-sourced Ford Courier, the model line has been sold across the Americas; Ford of Argentina began production of the Ranger for South America in 1998.

For the 2019 model year, Ford introduced a fourth generation of the Ranger after a seven-year hiatus. The first midsize Ranger in North America, the fourth-generation Ranger is derived from the global Ranger T6 to fulfill North American design requirements. Ford of Argentina has produced Rangers in its General Pacheco facility since 1998; since 2012, the facility has produced the global Ranger T6. Following the rise of the compact truck segment during the 1960s, Ford entered into a partnership with Mazda to market the Mazda B1800 in North America; the Courier would become the first of several jointly manufactured vehicles between the two companies from the 1970s into the 2000s. In 1977, the Courier and B1800 later B2000 were redesigned with a larger cab, redesigned pickup bed, and tailgate. To avoid the 25% Chicken tax on imported trucks, both vehicles were imported as cab-chassis trucks taxed at 4% tariff. Following their importation to United States, pickup truck beds shipped separately from Japan were installed before shipment to dealers. From 1993 to 2004, production also was sourced from Edison Assembly in Edison, New Jersey. For its entire production run until 2011, the Ranger was produced at Twin Cities Assembly Plant in St Paul, Minnesota. The final 2012 Ranger produced on December 16, 2011, ended 86 years of production at Twin Cities Assembly as well as the production of all compact pickups in the United States. During the 1990s and 2000s, Mazda adopted a badge-engineered version of the Ranger, for their B-Series nameplate the reverse of the Ford Courier produced by Mazda. For 1991, the Ford Explorer SUV was derived from the facelifted Ranger, sharing its front fascia, chassis, and interior components. A three-passenger bench seat was standard, with various types of bucket seats offered dependent on

trim level. In 1986, the instrument cluster was revised, allowing the fitment of a tachometer.

To streamline production, the Ranger shared interior components with other Ford vehicles, sharing the steering column, door handles, and window controls from the Ford Escort, Ford F Series, and Ford Bronco; nearly the entire driver's compartment of the Ford Bronco II was directly sourced from the Ranger. While still largely a work truck, the Ranger XL offered colorkeyed trim, floor mats, and chrome bumpers. Sharing no body panels with its predecessor, the redesigned Ranger shifted from a smaller proportioned F Series to a more aerodynamic design, no longer sharing its front fascia with the Ford Explorer. For the first time in the compact segment, the Ranger offered a stepside bed with the Ranger Splash. Two wheelbases were carried over from the previous generation 107.9 inches short bed, 113.9 inches long bed, with the SuperCab lengthened to 125.2 inches 0.2 inches longer. In line with the Aerostar and Explorer, the Ranger adopted more aerodynamic body contours, with flushmounted door glass, a lower hoodline, taller and wider doors exterior rain gutters were eliminated, in line with the Ford Taurus; sideview mirror brackets were eliminated. In a major departure from other compact pickup trucks, the cab was widened nearly three inches, matching the midsize Dodge Dakota in width. Distinguished by a revised grille common for both rearwheel drive and 4x4 Rangers, the 1995 Ranger shared its dashboard with the second generation Explorer, with more ergonomic controls and a double DIN radio head unit. For 1995, all Rangers adopted a fourhole grille. The base Ranger S meant largely for fleets was discontinued, with the XL becoming the standard Ranger trim. Alongside the standard XL was the XL Sport, Splash, XLT, and STX. Alongside the FlareSide pickup bed, the Splash was fitted with a lowered suspension 1 inch in rear, 2 inches in front for 2WD versions; all versions were fitted with 4x4 Ranger grilles.

In line with the larger F150 and Super Duty trucks, Super Cab Rangers gained rearhinged doors for 1999, becoming the first model line in the compact truck segment to do so. Ford of Argentina introduced a crewcab variant of the Ranger for South America in 1998; the Ford Ranger EV was the first electric vehicle produced by Ford in the United States. The Ford Explorer Sport Trac midsize pickup truck shared its wheelbase and some components with the Ranger. The same year, the Ranger adopted the overheadcam version of the 4.0L V6 originally introduced in the Explorer. With the exception of a passengerairbag lockout switch, the interior saw little change since its 1995 redesign. For 2001, the front fascia was redesigned with a new grille and headlamps; the amber turn signals were deleted from the taillamps. The rear of the Ranger underwent several changes, with larger taillamps and a Ford Blue Oval centered in the tailgate. For the first time since 1989, the Ranger fender badging was redesigned with a larger design. After 2007, the STX was discontinued, with 2009 serving as the final year for the FX4 produced in 2010 for Canada. The twodoor standardcab configuration is no longer produced; all examples are SuperCabs or SuperCrews. While Ford Argentina produced crewcab Rangers during the 1990s and 2000s, this is the first Ranger offered with four full doors in the United States and Canada effectively succeeding the Ford Explorer Sport Trac. For the first time, no V6 engine nor any manual transmission is offered; a 2.3L turbocharged inline4 and a 10speed automatic is the sole powertrain offering as of 2020 production. Originally fitted with leadacid batteries, Nickel metal hydride NiMH batteries were introduced for 1999. While using the frame of a 4x4 Ranger, the Ranger EV was rearwheel drive with a rear-mounted driveline. It is also the only rearwheel drive American-produced Ford fitted with a de Dion rear suspension.

Externally, the Ranger EV is primarily distinguished from a standard Ranger by its grille; the Ranger EV has a grille-mounted charging port on the right third of its grille. While most fleetleased Ranger EVs were returned to Ford after the end of the lease and dismantled, some Ranger EVs leased by individuals were purchased and remain in use. For Mazda, whose 1986-1993 B Series had struggled in North America, the new B Series was a variant of one of the highest-selling compact trucks. Separate from the Ranger, the Mazda Truck received what would be its final exterior update; on a redesigned

front fascia, the Mazda badge was centered into the grille. After 2007, the B3000 was discontinued. Ford ended production of the 3.0L Vulcan V6 within a year. As Mazda North America began to shift away from pickup truck sales, the Mazda Truck was withdrawn from the United States after the 2009 model year; leftover production was sold in Canada for 2010. By November 1997, supply was increased with both diesel and gasoline engines, two-wheel and four-wheel drive, and different levels of equipment. After two years of local production, Ford of Argentina introduced a redesigned version of the Ranger for 1998. For 2004, both versions were given the same grille though Argentine-produced versions were designed with projector-style headlamps. Exclusive to South America, the update replaced the hood, front fenders and bumper with a more aggressive design; to allow for a more aggressive stance, large wheel arches were included. For the first time, the Ranger adopted the Ford three-bar corporate grille; the door handles were redesigned, shifting to a loop-style design. The interior was largely unchanged, as were the powertrain offerings. Designed by Ford of Australia, the Ranger T6 consolidated the Ford and Mazda-based versions of the Ranger onto a single platform sold globally, introduced to North America for 2019. Ford makes automobiles that present the essence of luxury and power arranged in a safe and stylish design. Ford autos have a reputation for good looks and a variety of safety equipment. Ford is a well-known creator of dependable cars that blend economical expense with optional upgrades. Experience luxury like never before and look forward to running errands when you choose to buy a nice ride that allows you to have space and comfort like the Ford Ranger and similar models. Buying a luxury car often means more costs, and not just right off the bat, but on replacement parts as well and is important to remember when you think about buying a vehicle like the Ford Ranger. Every car has a variety of features which can range from antenna masts to hood struts. A Ford Ranger Repair Manual is helpful for the automotive hobbyist and serious mechanics alike. A Ford Ranger Repair Manual specifically covers on the car it was produced for, down to the year, make, and model. Using a Ford Ranger Repair Manual should make car maintenance more affordable than a trip to a mechanic. Your Ford Ranger Repair Manual can save you money by teaching you how to fix your car without an expert. This part is also sometimes called Ford Ranger Service Manual. We stock these Repair Manual brands for the Ford Ranger Haynes and Chilton. It tells you every step that you need to do to repair your truck. There are a couple pics at the top of every page that the instructions refer to. These pictures are in black and white and are about 3 in. x 3 in.
