Reload to refresh your session. The first four-door SUV produced by Ford, the Explorer was introduced as a replacement for the two-door Bronco II. Deriving its name from a trim package used on the F-Series pickup trucks as with the Ranger, the Explorer is slotted between the Edge CUV and standard-wheelbase Expedition. The first two generations were directly derived from the Ford Ranger, switching to a model-specific chassis for two generations. The fifth generation adapted a variant of Ford Taurus chassis architecture developed for SUV use, with the current generation again reverting to a model-specific chassis. Alongside the five-door Explorer wagon, a three-door wagon was offered from 1991 to 2003 effectively succeeding the Bronco II.

For police use, Ford has developed the Ford Police Interceptor Utility, serving as a replacement for the replacing the Ford Crown Victoria Police Interceptor and the Taurus-based Police Interceptor Sedan. Louis Assembly Plant Hazelwood, Missouri; the model line is now currently produced at Chicago Assembly Chicago, Illinois. To better compete against the Chevrolet S10 Blazer and Jeep Cherokee midsize sport utility vehicles, Ford sought to replace the Bronco II with a vehicle sized closer to its competitors. In an effort to attract family buyers, a four-door version was developed alongside the two-door launched the same month as the four-door S10 Blazer. In a major change from the Bronco II, the Explorer was given its own front door stampings. In addition, the additional width allowed for two major aerodynamic improvements; along with the elimination of exterior drip rails by wrapping the doors into the roof, the sideview mirrors were integrated onto the doors rather than bolted on. For 1993, the engine output was increased to 160 hp 119 kW. All Explorers were equipped with the Ford 8.8 axle in either a limited slip differential, or open version with a variety of available gear ratios. The XL was sold as the base trim, with XLT as the upper range, with the outdoor-themed Eddie Bauer trim as the top trim. The XL was distinguished by a black grille chrome optional with steel wheels, while the XLT offered a chrome grille and alloy wheels; the Eddie Bauer offered alloy wheels and two-tone paintwork. Offering black lower bodywork and grille and alloy wheels, the Sport was intended as a replacement for the Bronco II. Largely introduced as a competitor to the Oldsmobile Bravada, the Explorer Limited was offered only as a four-door with an automatic transmission.

Distinguished by its color-matched grille, headlight trim, and model-specific bodywork and wheels, the Limited was offered with several model-specific features, including automatic headlights, an auto-dimming rearview mirror, fog lamps, and center roof console with compass and outside thermometer. Retaining the same footprint as its predecessor, the 1995 Ford Explorer underwent extensive modifications to its chassis to improve its road manners. In an effort to better differentiate the model line from the Ford Ranger, Ford stylists redesigned the vehicle, giving the Explorer a model-specific exterior. As with its predecessor, the second generation was sold in both three-door and five-door configurations. Rear-wheel drive was standard, with four-wheel drive offered as an option. In early 2000, the Ford Explorer Sport Trac was introduced, which was a midsize pickup truck; offered with a crew cab with a short pickup bed, the Sport Trac was based on the five-door Explorer. The Explorer Sport Trac was produced through the 2005 model year until it was redesigned for 2007. To match the V8 engine of the similar-sized Jeep Grand Cherokee, for the 1996 model year, Ford introduced a 5.0 L V8 as an option. Initially available on rear-wheel drive XLT models, the availability of the 210 hp 157 kW V8 was expanded to many versions of the five-door Explorer, and came standard with all-wheel drive starting in 1997. For 1997, revised cylinder heads

increased output of the 5.0 L V8 to 215 hp 160 kW. Following the January 1996 introduction of the 4.6 L SOHC V8 by the Ford F-Series and E-Series, the Explorer would be the last vehicle in North America by Ford Motor Company sold with the company's oldstyle gasoline pushrod V8 for over 20 years a new pushrod V8 was introduced for MY 2020 in the Ford Super Duty trucks. Offered as standard equipment on the toptrim Eddie Bauer and Limited trims, the engine became an option on all other versions of the Explorer and Explorer Sport.

For 2001, the pushrod V6 was discontinued, with the SOHC becoming the standard engine in all versions of the Explorer and the sole engine of the 3door Explorer Sport. The SOHC did not receive the 5speed until 2000, but it was a stronger unit than the one behind the OHV. All V8 examples were equipped with a 4speed heavyduty automatic shared with the F150, Mustang, and Crown Victoria. For the V6 models, in place of Touch Drive from the previous generation, ControlTrac was an electronically controlled fulltime fourwheel drive system with a twospeed transfer case, with software controlling a multidisc clutch in place of a center differential. Similar to TouchDrive, ControlTrac is dashcontrolled, with a rotary selector for twowheel drive 1995-1996, 2001-2003 Sports, auto 1997-2001, high range, and low range. As part of the changes related to the redesigned front suspension, the entire front fascia was redesigned, with the Explorer gaining modeldistinct styling. In a styling theme that would be used in several other Ford small trucks, the 1995 Explorer was given an oval grille; the headlamps were changed from rectangular to oval as well, wrapping into the fenders. In contrast to the front fascia, the rear fascia saw relatively few changes, with the rear bumper nearly unchanged. Maintaining commonality with the Ranger, the Explorer was given a new dashboard marking the debut of dual airbags in an Americanproduced SUV, a new instrument panel; to improve user ergonomics, the Ford Explorer introduced a doubleDIN radio panel and rotarystyle climate controls. Distinguished by the addition of fender flares, the rear fascia was restyled, with larger taillamps; to better accommodate export, the license plate was shifted from the bumper to the liftgate; the neon CHMSL was replaced by an LED version. 16inch wheels replaced 15inch wheels shared with the Ranger. For 1999, the front bumper was redesigned, allowing for larger lower grille and fog lights.

Other options included loadleveling air suspension on Eddie Bauer and Limited and a reversesensing warning system. Along with the twotone Eddie Bauer trim, the highest trim Explorer was the monochromatic Ford Explorer Limited. For 2000, XLS replaced XL as the base trim introduced as an appearance package for 1999. While the XL remained the base model largely for fleets, most examples were produced under a single Sport trim level. In 1995, the Expedition trim was introduced; roughly the 3door equivalent of the Eddie Bauer, the trim was discontinued at the end of the model year as Ford reserved the name for the Ford Expedition fullsize SUV which entered production in mid-1996. As part of the change, the Explorer became only the second rearwheel drive American Ford platform fitted with fourwheel independent suspension behind the MN12 platform. In another major change, the thirdgeneration Explorer was developed solely as a fivedoor vehicle. Retaining the previousgeneration chassis architecture, the threedoor Explorer Sport continued production through the 2003 model year; the Explorer Sport Trac fourdoor pickup truck continued through 2005. No longer derived from the Ford Ranger, the UN152 chassis was designed specifically for the fivedoor Explorer and its LincolnMercury counterparts. In a major shift from its predecessors, the thirdgeneration Explorer adopted a fourwheel independent suspension configuration, never before used on a Ford truck on Americanproduced SUVs, fully independent suspension was previously exclusive to the Hummer H1. Ford's AdvanceTrac RSC Roll Stability Control system became available as a standard feature on the Explorer for the 2005 model year. A fivespeed manual transmission was offered for 2002 before its discontinuation; as of the 2020 model year, it is the final year a Ford Explorer was available with a manual transmission. As an option for both the 4.0L and 4.

6L V8 engines, the Ford 5R55 transmission was offered, becoming standard from 2003 to 2005. While sharing a number of design elements with the 1997 F-Series and Ford Expedition, the Ford Explorer also served as the introduction of a new design theme for several Ford vehicles; the 2003 Ford Expedition, the Ford Freestar, Ford Freestyle, and Ford Five Hundred would share various elements of the 2002 Ford Explorer design. Retaining nearly the same proportions as the first two generations, the third-generation Explorer was an inch shorter in length and two inches wider, gaining two inches in wheelbase. The cargo floor was lowered several inches, adding nearly 10 cubic feet of total cargo room. Coinciding with the lower cargo floor, on nearly all models, a folding third-row seat was either standard or an option, bringing seating capacity to seven. The rear liftgate was redesigned, with the upper hatch enlarged. Slotted below the XLS were two major trim packages, Sport Value, Sport Choice, with Sport Premium between XLS and XLT. The outdoor-themed Eddie Bauer continued production with a two-tone exterior with a tan lower body; the Limited wore a monochromatic body. The NBX trim was only made for 2003 and 2004, and was a loaded-up XLT with Eddie Bauer-esque features. It was more like a bang-for-your-buck Eddie Bauer model rather than an actual trim level, as it didn't really set itself apart in any way like XLS did from XLT. Along with this new, stronger chassis, Ford updated the interior, redesigned the rear suspension and added power-folding third-row seats. Also, a tire pressure monitoring system and electronic stability control became standard equipment. Power running boards, like the ones from the Lincoln Navigator, were also made available on the Explorer and Mountaineer; the running boards lower to allow easier access when entering the vehicle, then retract upon door closure.

Unlike previous generations, there was no right-hand drive option available for order, causing Ford to market Explorers in Japan in left-hand drive configuration. The LHD Explorers were desirable there because LHD vehicles are considered prestigious in Japan. Moreover, Ford switched to a one-piece rear liftgate design due to the problems associated with the previous generations design. A more powerful 292 hp 218 kW 4.6L 24-valve SOHC V8, similar to the fifth-generation Ford Mustang's engine, was available as an option. The 6-speed 6R automatic transmission, built by Ford and based on a ZF design, was made standard equipment with the V8 engine as well. The five-speed 5R55W automatic transmission was advanced. It was the only transmission available for the V6 engine, because the Mazda five-speed manual transmission was dropped in the previous generation. Unlike its predecessor sold through 2005, it featured the V8 engine as an option and was based on this generation Explorers platform. AdvanceTrac with Roll Stability Control was made standard on the Sport Trac. The model was planned by Ford SVT to be the successor to the F150 Lightning sports pickup truck. It had blacked-out headlights, black grill, monochrome color interior, unique front and rear bumpers, front fender vents, and molded-in running boards. It is designed for up to six passengers while improving fuel economy by 20 to 30 percent relative to the current V6 Explorer. The fifth-generation Explorer features sculpted body work with stepped style headlamps similar to the Flex, Edge, Escape, Expedition and F150, as well as new stepped style tail lamps. The grille features Ford's corporate three-bar design with upper and lower perforated mesh work, similar to that of the sixth-generation Ford Taurus. At first only one engine was available the 290 hp 216 kW 255 lb-ft 346 Nm of torque 3.5 liter TiVCT Twin independent Variable Camshaft Timing V6 attached to either the 6-speed 6F automatic or 6-speed 6F SelectShift automatic.

Each mode is selected via a rotary control dial on the center console, aft of the transmission shifter. The new Explorer will be available with an optional trailer tow package. The package includes a Class III trailer hitch, engine oil cooler, trailer electrics connector, trailer sway control TSC, wiring harness and a rearview camera with trailer alignment assistance to help in backing up to a trailer. If equipped with the trailer tow package the new 2011 Explorer will be able to tow up to 5,000 lb 2,268 kg of braked trailer. Other optional safety features include BLIS blind spot information system with rear cross traffic alert, forward collision warning with brake support precrash system, Auto highbeam, Roll Stability Control RSC, Electronic stability control ESC and Curve Control. Air

bags are sewn into the inside of the seat belts, and inflate with cold air to prevent burns. The rear of the Explorer was also refreshed with restyled LED tail lamps and dual exhaust outlets. The 2016 refresh bumped the I4 engine to a 2.3 Liter EcoBoost fourcylinder engine from the 2015 Ford Mustang. A newly introduced Platinum trim now tops out the range, slotting above the Sport and Limited trims. Similar to the Platinum editions of the F150 and Ford Super Duty trucks, the Platinum trim features front and rear cameras, enhanced active park assist with perpendicular park assist, parkout assist and semiautomatic parallel parking, handsfree liftgate from the Ford Escape, an exclusive 500watt Sony surround sound system, and a heated steeringwheel. The Platinum trim is paired with a 3.5 Liter EcoBoost Twinturbo V6 with 365 bhp 272 kW which was previously only available with the Sport trim. The 2016 Explorer went on sale at dealerships in the Summer of 2015. Other than the addition of the topoftheline Platinum trim, as well as standard eighteeninch alloy wheels on the base Explorer trim, the changes are mainly in styling, exterior and interior color combinations, technology, and power.

XLT Desert Copper and Limited Luxury package. The turbocharged 2.3liter EcoBoost inlinefour is the standard engine on the new Explorer, with 300 hp 224 kW and 310 lbft 420 Nm of torque. It comes with a new 10speed automatic transmission and either rear or allwheel drive. Its maximum tow rating is 5,300 lb 2,404 kg. An optional twinturbocharged 3.0liter EcoBoost V6 makes 365 hp 272 kW and 380 lbft 515 Nm of torque, while the ST with the same engine makes 400 hp 298 kW and 415 lbft 563 Nm of torque. It also mates with a 10speed automatic and sees an increase in towing capacity, to 5,600 lb 2,540 kg. An Explorer Hybrid will also be available in the US with a initially detuned 3.3liter V6 producing a combined 318 hp 237 kW. For the first generation, the threedoor was available in any trim except Limited, with Sport offered as a trim exclusive to the threedoor. Distinguished by blackcolored wheel wells and rocker panels, Sport was slotted between XL and XLT. For 1995, Expedition was offered as a trim package for the threedoor Explorer; replacing the Eddie Bauer trim, the nameplate was retired after 1995 in preparation for the 1997 fullsize fourdoor SUV. For 2001, the Explorer Sport was split from the fourdoor Explorer, retaining the secondgeneration body and chassis and adopting the front fascia of the Explorer Sport Trac. In contrast to the Ranger, the Sport Trac was marketed primarily as a personaluse vehicle rather than for work use. Sharing the frame and wheelbase of the Ranger SuperCab, the Sport Trac combined the front fascia of the Explorer Sport with a crew cab derived from the fourdoor Explorer; the pickup bed designed for the model line shared its tailgate with the F150 SuperCrew. After skipping the 2006 model year, a secondgeneration Sport Trac was produced from 2007 to 2010 derived from the fourthgeneration Explorer.
