We wanted it to look like something you'd want to take into the rough country. Two-door models, however, received longer doors and front seats that could fold forward to assist in rear passenger entry and exit. These were unrelated to the similarly named full-sized Grand Wagoneer models that had carried the Wagoneer name before this point. The XJ firewall was notched to accommodate the longer 4.0 L engine. This marked the first time any Jeep product was offered with two-wheel drive since 1967, and was done in the hopes of attracting a few more buyers who did not need or want to pay for four-wheel drive. <http://tomsund.com/userimages/epson-stylus-cx3650-service-manual.xml>

When the XJ Cherokee-based Comanche MJ truck was introduced, it was also available in two and four-wheel drive. The new two-wheel drive models shared the front suspension from the track bar, control arms, ball joints with four-wheel drive models. Jeep simply used a single axle tube from hub to hub with no differential between, resulting in an inexpensive front suspension. This added the side benefits of improving reliability and easing diagnostics. The Jeep XJ has remained a popular choice by offroading enthusiasts due to its potent offroading capability in stock form. The Cherokee AHB police package was introduced during the 1992 model year. In response, for 1996, Jeep released a special version of the XJ Cherokee SE for police and fleet use. The new HO engine replaced the older 177 hp version of the 4.0 L engine in all installations. As a spinoff, it allowed Jeep in later years to enter right hand drive markets — the Cherokee went on sale in both the United Kingdom and Ireland in 1993. Both the two and four-door bodies remained in production, receiving a steel liftgate replacing the fiberglass one used previously, restyled taillights, additional plastic molding along the doors, as well as a new front header panel that featured more aerodynamic styling. The spare tire remained mounted to the interior rear quarter panel on the drivers side in the trunk. A new, unique spare tire carrier was invented by Peter Gruich while working for Jeep Special Programs that utilized the trailer hitch bar and a unique pivot bracket and although it was the only external spare tire carrier to pass the full Jeep durability test, it was not offered for sale. A stiffer unibody frame brought improvements to noise, vibration, and harshness NVH measurements. Also contributing to NVH improvements were new door seals that reduced wind noise at higher speeds. http://fiestadrivingschool.com/phpsites/involve_audio/uploads/epson-stylus-cx3800-printer-manual.xml

This was done to help counteract smaller exhaust porting on the latest casting of cylinder heads, which was done to meet more stringent emissions control laws. Both the four and six cylinder engines were offered through the 2000 model year, though only the straight six was available in 2001. Transmission, axle, and transfer case choices were carried over from the previous models. As expected, production of the Cherokee Special Service Package continued for the 1997 model year into the 2001 model year. It still had the same features as the 1996 Cherokee Special Service Package, but the engine now produced 195 hp 145 kW. In 2001, when the XJ Cherokee ceased production and was replaced by the Jeep Liberty, the Cherokee Special Service Package was discontinued. The Jeep Liberty never featured a special service package, however, police, and government agencies used the Liberty in their fleets. SE replaced Base in 1994. In later years it was the only trim level offered for the two door model. Considered by AMC to be a separate model and not part of the Cherokee series. Replaced by the Country in 1993. Was replaced by the Country in 1993 and then rejoined the lineup in 1998 to replace the Country. Replaced by the Classic and Limited in 1998. Briefly replaced by the Limited in 1997, and rejoined the lineup below the Limited in 1998. Orvis logo embossed into each headrest, golden Orvis logo on top of the ashtray lid. Available with the 4.0 liter AMC 242 inline six with the Aisin AW4 4 speed automatic. Based on the Sport trim level. Based on the Sport trim level. 2001 only model. CommandTrac was standard on XJ models built with 4WD. This configuration allows the XJ to have superior offroad capability and performance at the expense of some onroad comfort and driveability. Mid 1985 and later two wheel drive models used the same basic suspension with a single tube connecting axle ends with no differential. A panhard rod, also referred to as a track bar, is used to locate the axle laterally.

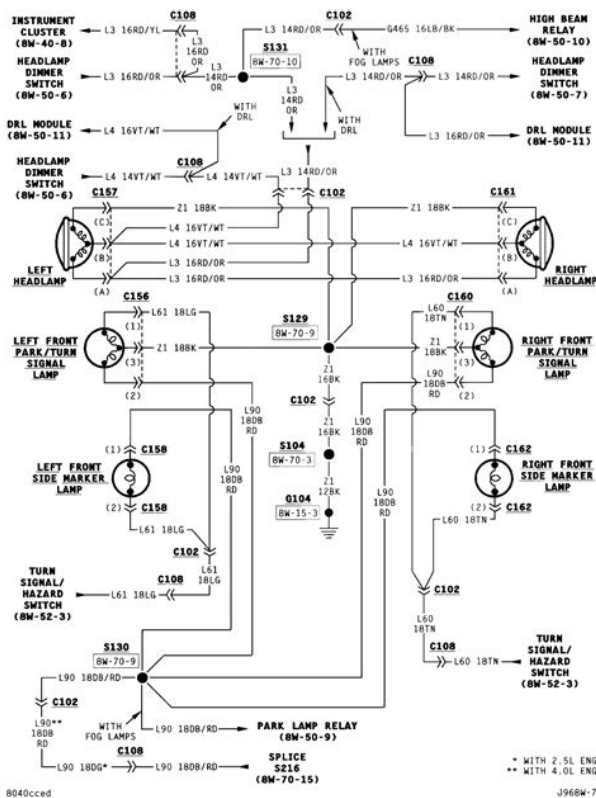

Two coil springs are seated on top of the axle housing as well as two gas charged shock absorbers. The suspension used on vehicles with the optional UpCountry package provided one inch of lift over the standard suspension. A sway bar is utilized to reduce body roll in turns. Each leaf pack contains four leaf springs with a fixed eye at the front of the spring and a compression style shackle at the rear of the spring. However, righthand drive European markets only began to officially receive them in RHD form in 1993, although a small number of personal imports had been reaching the UK in lefthand drive form for a number of years before that. Models were offered in both markets until the XJs discontinuation in 2001, at which point it was replaced by the Jeep Cherokee KJ which retained the Cherokee name for sale in Europe despite sharing little mechanical heritage with its predecessor. Available in both right and lefthand drive models, they were designed to comply with relaxed motor tax regulations in some EU member states governing vehicles intended for primarily commercial use. Both two and four door versions are known to have been sold, with the main differences from the standard models being metal panels in place of the rear side windows, no rear seats, and a completely flat cargo area. Two and four wheel drive variants were available, powered by the VM Motori 2.5 L diesel engine mated to the Aisin AX15 manual transmission. The interior also

got a new steering wheel and center console. Production ended in 2014. All Chinese spec Jeeps had a 5 speed manual gearbox as standard. The BJ212 platform was used to make the car. The SHZJ213 used the 2.4 litre BAW 492 engine paired to a 5 speed manual gearbox. Jeep also believes the Cherokee name will attract previous Jeep owners, because of the names heritage. The new Cherokee is built in Toledo, Ohio. As of mid 2017 the new Cherokee KL is produced in Belvidere, Illinois. Retrieved 6 May 2017. PublicAffairs. p. 41. ISBN 9781586481230.

Thanks to this powerful, reliable and able to move in almost any conditions, SUVs of the brand receive enthusiastic reviews of car owners not only in the US, but all over. In the competition, as a result, participated 3 automakers American Bantam Company, The most successful model was introduced by American Bantam. As a result, both manufacturers received an order of 1500 cars. Deliveries of new products started already in 1941. And six months later, The car was equipped with a Willys 77 engine and a three-speed transmission. In the postwar period, the company was engaged in the creation of cars, which did not differ much from the The civilian jeep. Just at that time, the popularity of Willys products began to gradually decline. As a result, in 1953, Willys became a member of Kaiser. Since 1972, the manufacturer began to equip its cars with fully automatic transmission with a permanent all-wheel drive. One of the In 1974, debuted the sporty two-door Cherokee, and in 1976, the release of the updated CJ7, which was equipped. In 1978, the limited edition Wagoneer was launched a Limited modification with leather interior, radio and The car offered the traditional advantages of the Jeep family endurance and unsurpassed. In 1992, at the auto show in Detroit started a new line of midsize SUVs Grand Cherokee, which At that time, the Grand Cherokee was the best car in its class, and its success was terrific. The car combined a refined design, excellent patency, softness of course and, of course, safety. Thanks to these features, the car has set. Also this year the new The car was equipped with a QuadraDrive II transmission, which allowed the transmission of Every year, the company's engineers add to their models more and more useful new features that Especially popular in the Jeep range are the Cherokee, Grand Cherokee, Wrangler and Compass models.

See the seller's listing for full details and description of We aim to supply the best quality parts we can, we describe things accurately and hope that you have a good experience when buying from us. As you can see we have amazing feedback from nearly all of our buyers, we have hundreds of comments about our honesty, politeness, service and willingness to help whenever we can. We are clearly not in it for the quick buck; we value our reputation and the feelings of people who buy from us. We hate to disappoint as we know from our own experiences how frustrating it can get when fixing problems with cars. Whilst we make every effort to ensure we don't make mistakes, on rare occasions, mistakes are made, we are only human after all. The important thing is that we rectify any mistakes we make.

Here is the process you are agreeing to when buying from us. We will advise where we can but ultimately it is YOUR decision. Signing for an item as UNCHECKED is always risky and is not acceptable. You are of course entitled to return it to us under the following understanding. If no warranty period is detailed in the advert then the standard 30 days from date of receipt will apply. We will only issue a refund for a returned part if it is OUR part that you actually return. Part dismantling of the goods or removal of the identifying marks will render your warranty VOID. If we supply you a part and it fails in the warranty period we are not in any way liable for any associated costs, be it removal and refitting costs, loss of business reputation or work. Warranties are only valid if you have proof that a new cam belt was fitted prior to installation if applicable. Warranties supplied only cover the head, block, crank and sump, it does not cover bolt on components such as turbos, alternators, pumps, belts, pulley, idlers, water pipes, fans, thermostats or mountings. These units are not covered by warranties, purely because there is no way of knowing whether your car is faulty and could have damaged the units during fitting. We always check the electrics before dismantling. You have to trust us that these work, we are a reputable seller and don't want to tarnish our excellent reputation selling broken parts. You're covered by the eBay Money Back Guarantee if you receive an item that is not as described in the listing.
