From the United StatesIt convinced me that I like the convenience of the format for situations like working out at the gym; however, this is pretty much a piece of junk. There is a plastic loop for a lanyard situated at one end between the two microplug jacks and there isnt quite enough clearance for the plug on either side, so over time the headphone plug starts to lose contact and one channel or the other cuts out. Ive tried to open the player up to attempt a fix, but it doesnt look promising. The player takes a single standard AAA battery and get probably 15 20 hours before needing replacement or recharging, so I will give it credit for efficiency. If the device were sturdier, Id recommend it wholeheartedly even with its shortcomings, but Im ultimately disappointed in it though persuaded that I want to replace it with another MP3 player.Please try again later.
