When the signal from an FM radio station is weak Radio wave may be weak depending on the building structure and environmental conditions. In that case, manually tune into the radio station of your choice by referring to the next section. The frequency changes by 1 step each time you press the button. The frequency changes continuously if the button is held down and stops when the button is released. Tune by looking at the display. The unit automatically tunes into an FM station. To enter 87.5 FM, for example, press 8, 7, 5, or 8, 7, 5, 0. If you entered a wrong number, you can enter a correct one after 8 seconds. Registering radio stations in advance allows you to tune into your radio station of choice directly. When registering, the preset number stops flashing. Alternatively you can press PRESET on the main unit.

You can also select by directly entering the preset number with the number buttons on the remote controller. When deleting, the number on the display goes off. RDS works only in areas where RDS broadcasts are available. In some cases, the text information appeared on the display is not identical to the content transmitted by the RDS station. Furthermore, unexpected characters may be displayed when the unit receives unsupported characters. However, this is not a malfunction. If the signal from an RDS station is weak, the RDS data may be displayed continuously or not at all. PS Program Service Tuning into a radio station distributing Program Service information displays the radio station name. Pressing DISPLAY displays the frequency for 3 seconds. RT Radio Text Tuning into a radio station transmitting Radio Text information displays text on the display of the unit. PTY Program Type Allows you to search for RDS stations by program type. TP Traffic Program Allows you to search for radio stations transmitting traffic information. The current program type appears on the display. 2. Press PRESET to select the type of program to search for. Then, press ENTER again. Playing Content from a USB Storage Device Operation You can set up by viewing the guidance displayed on the TV screen. To display the guidance, you need to make HDMI connection between the unit and TV. Select the item with the cursor buttons of the remote controller and press ENTER to confirm your selection. To return to the previous screen, press RETURN. This may cause data corruption or malfunction. 3. Press ENTER. The list of folders and music files on the USB storage device is displayed on the screen, select the folder with the cursors and press ENTER to confirm your selection. 4. With the cursors, select the music file to play, and then press ENTER or to start playback.

Listening to Internet Radio About Internet Radio Internet radio, also called net radio, web radio or streaming radio, is an audio service accessible at the websites of service providers who distribute music and audio programs in digital format. There are numerous websites all over the world, from terrestrial station, special station to personal website that provide such a service. Listening to Internet Radio TuneIn With more than 70,000 radio stations and 2 million ondemand programs registered, TuneIn is a service where you can enjoy music, sports and news from all over the world. Using Multiple Accounts The AV receiver supports multiple user accounts, which means you can freely switch between several logins. You can either store a new user account, or delete an existing one. Some of the services don't allow the use of multiple user accounts. You can store up to 10 user accounts. You can register up to 40 Internet radio stations. Depending on the data type and file format for playback, you may not be able to play an Internet radio station even when its format is PLS, M3U or Podcast RSS. Available services may vary depending on your area of residence. Registering a Station Before starting the procedure The name and URL of the radio station that you want to add are required for registration. Registering a Station with PC Before

starting the procedure The name and URL of the radio station that you want to add are required for registration.

Check them before starting the procedure. 1. Press RCV on the remote controller. Write down the IP address since you will need it later. 5. Open the Internet browser on your PC or smartphone and enter the IP address of the unit in the URL field. Rename the station as desired. DLNA Music Streaming About DLNA Digital Living Network Alliance DLNA can be referred to as a technology standard or the industry group to develop the technology standard to interconnect and use AV components, PCs and other devices in a home network more precisely the technology standard is called the DLNA guidelines. The unit allows you to use DLNA to play music files stored on a PC or a hard disk connected to your home network NAS device. Make sure the unit and PC or NAS device are connected to the same router. To play a music file with DLNA, you need a NAS device or the like with DLNA server functions and a DLNA player software to stream the music. You can also stream music files using a PC installed with Windows Media Player 11 or 12 as they are equipped with both DLNA server and player functions. To enable streaming, you must first configure the Windows Media Player 11 or Windows Media Player 12. With Windows Media Player 12 Remote Playback function, you can stream music files stored on your PC to the unit by operating the PC. DLNA Music Streaming DLNA Playback Operation You can set up by viewing the guidance displayed on the TV screen. Searching does not work in servers that do not support search functions. The unit cannot access pictures and videos stored on servers. Contents stored on the server may not be displayed depending on the server sharing settings. 5. With the cursors, select the music file to play, and then press ENTER or to start playback. DLNA Music Streaming Controlling Remote Playback from a PC You can use this unit to play music files stored on your PC by operating the PC inside your home network. The unit supports remote playback with Windows Media Player 12.

To use the remote playback function with Windows Media Player 12, Windows Media Player 12 must be configured in advance. Using a DLNAcompatible controller such as an Android application, you can select a music file stored on Windows Media Player 12 and stream to this unit by operating the controller. For information on how to remotely play using the controller, refer to the controllers instruction manual. The playback screen is displayed on the TV connected to the HDMI output of the unit. Some times, the volume displayed on the remote playback window may differ from that appeared on the display of the unit. Music Streaming from a Shared Folder About Shared Folder A shared folder is configured in a network device such as a PC or NAS hard disk connected to your home network for access from other users. You can play music files in a shared folder on your PC or NAS connected to the same home network as that of the unit. To play music files in a shared folder, you must first configure Windows 8 or Windows 7, Make sure the unit and PC or NAS device are connected to the same router. The sharing options must be configured and a shared folder created on the PC in advance. For information on how to configure the NAS device and create a shared folder, refer to the NAS devices instruction manual. Creating a Shared Folder 1. 2. 3. 4. 5. 6. Select the folder to share and rightclick. Check whether a workgroup is set. Music Streaming from a Shared Folder Playing from a Shared Folder Operation You can set up by viewing the guidance displayed on the TV screen. You can check the server name of your PC from the PC properties. 4. With the cursors, select the target shared folder, and then press ENTER. 5. If a username and password is required, enter the necessary login information. The login information is the account information set at the time of creating the shared folder. Once entered, the login information will be remembered from the next time onward. 6.

With the cursors, select the music file to play, and then press ENTER or to start playback. Using Remote Controller for Playing Music Files About the Remote Controller The remote controller of this unit allows you to play music files stored on USB storage devices, Internet radio, PCs and NAS devices on your home network, as well as on Bluetoothenabled devices. It also allows you to view

information of the music file being played and perform various other operations. Available buttons may vary depending on the service and device to play. Some buttons cannot be used with Bluetoothenabled devices. Furthermore, the Bluetoothenabled devices must support the AVRCP profile. Some devices may not be operated, even when they support AVRCP profile. This button is not operable from 10 seconds before the playback ends. 4 This button plays the current track from the beginning. This button is not operable from 10 seconds before the playback ends. 9 This button plays the next track. F This button starts the playback. G This button pauses the playback. H SEARCH This button toggles between the playback screen and list screen during playback. I This button stops the playback. J RANDOM This button performs random playback. K REPEAT This button replays the trackor tracks. Pressing this button repeatedly cycles through the repeat modes. L DISPLAY This button changes the displayed track information during playback. Pressing this button when the list screen is displayed toggles the screen to playback. Bluetoothenabled devices Usable buttons are,,,,,, and. Using Remote Controller for Playing Music Files Icons Displayed during Playback Icons are displayed on the display during music file playback. The meaning of each icon is as follows Folder Track Play Pause Fastforward Fastreverse Artist Album Repeat One Track Repeat within a folder Repeat Shuffle Using the Listening Modes Selecting Listening Mode The listening modes allow you to select the best sound effect for your input source. 1.

Press RCV on the remote controller. Always press RCV first to change the remote controller to RECEIVER mode the mode to operate this unit since its mode may be changed to operate another component. 2. Press one of the following buttons depending on your choice from among the four listening modes. Pressing a button changes the listening mode to that chosen. Set the listening mode of your choice by listening to the actual sound. Selectable listening modes All Ch Stereo Stereo PURE AUDIO button on the main unit only European, Australian and Asian models The display and analog video circuit is cut off to switch the unit to PURE AUDIO mode European, Australian and Asian models and provide purer sound. Selecting this mode lights the PURE AUDIO indicator on the unit. Pressing the button again reselects the previous listening mode. Selecting Pure Audio for listening mode turns off the display and analog video circuitry, but the video signals input through HDMI input are output from HDMI output. Using the Listening Modes Contents of Listening Modes Selectable listening modes will differ depending on the number of input source channels and the actual speaker configuration. Listening modes available when headphones are connected are Pure Audio European, Australian and Asian models, Mono, Direct, and Stereo. Lists in alphabetic order AZ All Ch Stereo Ideal for background music, this mode fills the entire listening area with stereo sound from the front, surround, and surround back speakers. Input source MONO, STEREO, 5.1 ch, 7.1 ch Speaker configuration 3.1 ch, 5.1 ch, 7.1 ch Direct In this mode, audio from the input source is output asis. For example, if a 2 ch source from a music CD is input, the output will be stereo, or if Dolby Digital signal is input, the sound field will be controlled in accordance with the number of channels present. Input source MONO, STEREO, 5.1 ch, 7.1 ch Speaker configuration 2.1 ch, 3.1 ch, 5.1 ch, 7.

1 ch Dolby D Dolby Digital This mode is for use with Dolby Digital sources. The audio from the input source is output asis, without surround sound processing. When playing back 5.1 ch sources from Bluray Discs, Dolby Digital is automatically applied. It is suitable for the Dolby EX soundtrack containing the matrixencoded surround back channel. Adding the surround back effect to 5.1 ch source will improve spatial representation by creating a moving sound effect of 360degree surround sound or overhead sound and giving a realistic experience. Input source STEREO, 5.1 ch PLIIx Movie and PLIIx Music only Speaker configuration 3.1 ch, 5.1 ch, 7.1 ch, 7.1 ch surround back PLIIx Movie and PLIIx Music only Dolby TrueHD This mode is for use with Dolby TrueHD sources. DSD This mode is for use with DSD sources. Input source 5.1 ch Speaker configuration 3.1 ch, 5.1 ch, 7.1 ch This unit supports DSD signals input through HDMI IN. However, depending on the connected player, better sound is possible when output from the PCM output of the player. In that case,

configure the player for PCM output. DTS This mode is for use with DTS sources. With 96 kHz sampling rate and 24bit resolution, it provides superior fidelity. Input source 5.1 ch Speaker configuration 3.1 ch, 5.1 ch, 7.1 ch Depending on the settings, this listening mode becomes DTS. DTS Express This mode is for use with DTS Express sources. DTSHD HR DTSHD High Resolution Audio This mode is for use with DTSHD High Resolution Audio sources. DTSHD MSTR DTSHD Master Audio This mode is for use with DTSHD Master Audio sources. DTS Neo6 This mode expands any 2 ch source for 5.1 ch multichannel surround playback. It offers fullbandwidth on all channels, with great independence between the channels. Completely discrete seven channels will improve spatial imaging and enable 360degree sound localization producing a sound crossing between the surround channels.

Use on the DVD with DTS ES logo, particularly on the software containing DTSES Matrix soundtrack. Playback becomes DTS if no surround back speaker is connected. ES Matrix DTSES Matrix This mode is for use with DTSES Matrix soundtrack and enables 6.1 ch or 7.1 ch playback using matrixencoded back channel. Use on the CD, DVD or LD with DTS ES logo, particularly on the software containing DTSES Matrix soundtrack. Full Mono In this mode, all speakers output the same sound in mono, so the sound you hear is the same regardless of where you are within the listening room. Input source MONO, STEREO, 5.1 ch, 7.1 ch Speaker configuration 3.1 ch, 5.1 ch, 7.1 ch GameAction In this mode, sound localization is distinct with emphasis on bass. Input source MONO, STEREO, 5.1 ch, 7.1 ch Speaker configuration 5.1 ch, 7.1 ch GameRock In this mode, sound pressure is emphasized to heighten live feel. Input source MONO, STEREO, 5.1 ch, 7.1 ch Speaker configuration 5.1 ch, 7.1 ch GameRPG In this mode, the sound has a dramatic feel with a similar atmosphere to Orchestra mode. Input source MONO, STEREO, 5.1 ch, 7.1 ch Speaker configuration 5.1 ch, 7.1 ch GameSports Suitable for audio source with much reverberation. Input source MONO, STEREO, 5.1 ch, 7.1 ch Speaker configuration 5.1 ch, 7.1 ch Mono Use this mode when watching an old movie with a mono soundtrack, or use it to separately reproduce soundtracks in two different languages recorded in the left and right channels of some movies. It is also suitable for DVDs or other sources containing multiplexed audio. Input source MONO, STEREO, 5.1 ch, 7.1 ch Speaker configuration 2.1 ch, 3.1 ch, 5.1 ch, 7.1 ch Multichannel This mode is for use with PCM multichannel sources. Input source 5.1 ch, 7.1 ch Speaker configuration 3.1 ch, 5.1 ch, 7.1 ch Orchestra Suitable for classical or operatic music, This mode emphasizes the surround channels in order to widen the stereo image, and simulates the natural reverberation of a large hall.
