Pines 5.0 out of 5 stars Made in January, 2009, this converter outperforms any currently made product of its type.[http://www.ultramarine.cz/\\_files/daikin-vrv-3-inverter-manual.xml](http://www.ultramarine.cz/_files/daikin-vrv-3-inverter-manual.xml)

Although it lacks the recently added features, such as an HDMI output jack or TV programming titles, it shines in the reliability, sensitivity and picture quality categories. What a pleasure to see a properly performing converter come out of its 7 year old box. Maybe because this unit was manufactured when digital transmissions were mandated would account for its high quality, or it could simply be the quality control of the manufacturer; whatever the reason, this is a great product. Its only minor downside is the printing of the control functions on the remote control. The letters are too dull and too small to read easily in a semilit room. Otherwise, this is the best DTV converter I have used, and Ive gone through too many of them. Attractive, Great Remote. Highly Recommend My favorite feature is that it will convert LD digital signals to analog. This is rare. Most add on converters only convert HD digital, not LD digital. There is a station in Columbus Ohio that broadcasts 6 channels in LD 480i and none of the other converters I own are able to receive and translate the LD signal to analog. For this reason alone I rate this a really great tuner. Extremely nice to get LD as well as HD. The second great feature is the remote. It has recall some remotes dont, easy to access and view signal meter, easy to use buttons. Nice remote. Third really good feature is you can tune stations on the box without the remote. This is a rare feature. Lastly, the box itself is attractive. The unit has a very pretty blue LED light when unit is on, red LED when unit is off. LEDs are not the silly little round type, the LED light is about 2 inches long, and diamond shaped. Very attractive touch. The only shortfall is the unit does not have an S video connector to TV. It has only the usual RG cable and RCA phono connections for TV signal out. But these work OK. Summation Great, really great unit. Love, love, love being able to watch LD TV as well as HD TV.

Very easy to use remote, well designed, very attractive LEDs. I am very pleased with this unit. Of the dozen or so I have owned, this is by far the best. If I ever need another converter I will definately buy this model again. September 2018 Update Still using this converter for my Old School TVs, continues to work flawlessly. Highly recommend this make and model converter. Probably the best ever made. With cable on the old TV sets you get a picture that is not full screen. With most of the standard free TV channels the picture is full screen. I like the idea of being able to switch to full screen whenever the programs are on standard TV. I find that they are more enjoyable viewing them this way. I have an analog big screen TV that is 30 years old and as long as it is working I refused to buy the updated modern screen TV. The Zenith is my favorite box to date. The remote is intuitive and requires only one battery. Best remote Ive used period. We have been watching broadcast TV for decades, before and after the switch over to digital signals several years ago. We use two four bay UHF indoor antennas facing different directions to get all the local channels. One of our tuner boxes failed recently and after trying several new boxes, and doing some research, settled on this older device. Weve gone from eleven to twenty three channels. This box is way more sensitive to weak signals than our old Magnavox tuner boxes. While it lacks modern touches like USB and HDMI, the fine remote, ease of configuration and tuner sensitivity make up for it and its ideal for those living in fringe areas. We use it with homemade four bay UHF antennas. We may buy another for a spare since none of the newer models have such great sensitivity to weak signals. The previous digital TV tuner would lose sound when the antenna signal was bad. and it wasnt getting all of the channels that my mom likes, so I bought this expensive Zenith digital TV tuner. This tuner does not lose signal on weak channels.

<https://www.cocreationsmanager.com/blog/adobe-reader-8-user-manual>

We live in Southern California and this tuner gets approximately 175 channels. The picture quality is great. The channels no longer lose antenna signal strength when someone walks past the TV and my mom no longer loses sound when an antenna signal is weak. Overall, she loves the Zenith Digital TV Tuner. We are using an Amazon Basics Leaf Antenna which is also amplified by the Amazon Basics TV antenna amplifier. Guide shows only one program ahead of current show. More expensive than the competition. Those who still have analog televisions will need to switch over to digital

broadcasts, and the Zenith DTT900 Digital TV Tuner is a nohassle, inexpensive way to do so for those who want to stick with analog sets. You dont have any choice, but you wont regret the upgrade, either All the converter boxes Ive seen deliver an excellent picture. It wont be HD quality, of course, but it will look better than the analog signal youve been used to Think DVD quality. The unit measures 1.8 by 8.5 by 6.4 inches HWD and weighs 1.7 pounds. Aside from the familiar Z logo on its face, the box is nondescript. Blue and red lights tell you whether its on or in standby mode, and thats about it. There are two coaxial connections on the rear panel one for antenna input and one for sending signal to the TV. There are also connections for stereo RCA audio outputs and a composite video output. There is, however, no smart antenna input—a feature the Apex DT250 offers. Once everything is connected and youve put the supplied AAA battery into the remote, youre ready to go through the guided onscreen automatic setup process. Using the Next button on the remote, youll move easily through different phases of setup, the most important of which is autoscanning for channels. Once the box has found all the digital signals, youll never have to surf through dead channels to find stations with a usable signal.

SEE ALSO Abhijit Bose appointed as country head of WhatsApp India The Display button offers a detailed description of the program youre watching, including its rating, aspect ratio, and scheduled time, as well as the current time. Guide offers an onscreen schedule of whats on and coming up next on all the stations you receive. Unfortunately, you cant use this for longterm planning, as it offers nothing beyond the next program. The CCD button toggles closedcaption mode, and Exit removes any menu text from the screen and returns to a normal viewing mode. In Setup, for instance, you can use autotuning or EZ Add to find stations, edit out stations you dont want, and change the output channel of the box its either channel 3 or 4. Under Option, you can adjust everything from the time zone to aspect ratio, language, audio output stereo or mono, and even block programs or TV channels with a passwordlocked menu. But I enjoyed using the Zenith box, found setup to be a cakewalk, and thought the options on the menu were useful and easy to navigate. Will technophobes have a hard time setting this up. I doubt it—and anyone who wants to keep that 1982 Goldstar TV is going to have to learn how to navigate digitally, regardless. He specializes in reviewing audio products, and is obsessed with headphones, speakers, and recording gear. See Full Bio. For a better look, you can open a few examples below.
