The Monster is one of the best selling motorcycles that Ducati has made. In the year 2005 alone, the Monster accounted for more than half of the nationwide sales of the Ducati brand. The design of the Monster was also built to impress. It features a naked design. This means that the engine and frame are exposed. This design allows for more efficiency in the structure of the motorcycle and has a certain aesthetic that riders love. There are actually several different engine models for the Monster and there have been more changes throughout the years. The Monster is labeled with an M followed by the number for the engine size. The Monster 696 was released in 2008. It has the highest output of power of any Ducati aircooled engine per cc. In 2014 the Monster family consisted of a 696, 796, 1200, and 1200S.

The current year model Monster has a whole array of features that make it one of the most unique bikes around.
