Ducati is owned by the German car manufacturer At first, this small enterprise was engaged in the production of radio components. After Due to the huge shortage of inexpensive vehicles, management decided to produce motorcycles.

So the company Ducati Most Italians when choosing light vehicles preferred the Ducati models. At first, the bikes had a 50 cc A few years later, Ducati motorcycles were equipped with an electric starter and a continuously variable transmission. In the 90s, in the production of Ducati engines, Until today, the brand introduces the most advanced computer technologies to increase competitiveness. This model is the ancestor of modern mopeds with pedals. Despite the small engine capacity of 50 cubic This, along with low weight, caused increased demand for Cucciolo in the distant 50s. Subsequent modifications were equipped with a Such characteristics allowed the development of. Such indicators were achieved due to the location of the camshaft in the head, which attracted the attention of motorcycle Athletes used this model in their competitions. The engine could withstand overloads for a long time and give out more than 11,000 revolutions. The Ducati Supersport 750 received the brand new Apollo engine, which allowed it to race at The frames of these motorcycles were made of an alloy of chromium and molybdenum, and the cylinders were made of aluminum. Every detail of the engine was designed on a computer. After a long and painstaking work, the designers managed to get The engines that were used in the assembly of this motorcycle are widely used on subsequent models.
