

Dukane Starcall Programming Manual

Overview

The Dukane Model 7A1110 Administrative Telephone (ATEL) provides user-friendly access to all the features of the Dukane StarCall communications system. The 16-character LCD display shows all telephone, intercom, and paging status information related to the unit. Time and date display when the ATEL is idle. Ring tones are locally generated and produce cadences distinctive to the type of incoming call.

Ring volume settings can be adjusted to high, low, or off.

- The 28 pushbuttons include:
 - One 52-button standard telephone key pad
 - One speaker phone button, one push-to-talk button, and a one-button volume-up/down switch
 - One menu button, eight programmable general purpose function keys and four programmable special function keys

The Dukane Model 7A1111A Standard Telephone, a "Carrier Grade" analog telephone, is sold specifically for use with the Dukane StarCall Communications System. The attractive, see-plate design and neutral color let the 7A1111A blend with any institutional environment.

The 7A1111A features seven programmable one-touch dialing buttons. These buttons can be programmed to allow one-button dialing of important numbers, such as an administrative office, security, or for medical assistance. They can also be programmed as call-in buttons. These programmed numbers can contain pauses in the dialing sequence. All numbers programmed into the memory are protected by a long-life lithium battery that backs up the memory whenever the 7A1111A is not connected to a telephone jack.

Standard Features

Administrative Telephone (ATEL)

Press question mark to learn the rest of the keyboard shortcuts Log in sign up User account menu 4 Dukane Starcall RAPID Software Coordinator 3 years ago Archived Dukane Starcall RAPID Software Duke doesnt make the Starcall anymore. The company they bought it from doesnt support Starcall anymore. No other company in a 500 miles radius supports it. Parts are all EoL. You can only program the damn thing via their RAPID software, which is serialbased. They have no idea where the disk is for that. And since Dukane has washed their hands of it, their no help. They need this by Monday. My school has run into the same problem but somewhere in the past someone lost the software. 4 years ago the principal turned all of the bells off but now we cant get them back on. I can dig around for you if nothing else comes up. Im not in the office at the moment so I cant say for sure what version it is. And they still put this in. This is now our standard install district wide well minus the Dukane level 2 Former Cranky Tech. However, I have no idea how to have the starcall constantly listen to it to make sure they get broadcasted out. Any suggestion Ive used Bellcommander before and love it, and would jump on this in seconds. I used to work on these a lot. Theyre a great system for their time and until about 4 years ago was manufactured, then a sudden end of life. The products were purchased by Carehawk out of Canada and the last I spoke to Carehawk, they are still supporting the product. I just stumbled into this searching for the RAPID default password because I havent used it in 2 years. Ill try to follow this thread for updates. I need to figure out how to change the current bell schedule. Can anyone provide some guidance. All rights

Natalie Login to post I am trying to program our Intermatic ET70215C for our school. Do not have the manual. I am familiar with the unit but missing a step. I need to set the school bells at various times. I have no idea what that would be for you. There are some online distance education programs based in the United States which are available for students residing outside of the USA. I am answering from the United States. Plus, honestly, Fixya.com is not the best website for asking your question. It is intended as a website for asking and answering questions on REPAIRING THINGS. Best wishes. You need to contact them. Firstly you need to find a proxy that isnt blocked at your school and then you need ip address of the proxy. Close all of your running programs like msn mircrosoft office programs ect. Your school, as have many others, have blocked your access to My Space, because they believe there are problems with the website. Viruses could easily wind up in your computer, and affect the school computers, plus a host of other issues. At least this is my theory of what they believe. Install Ubuntu NOT a good idea! Why 1. Because you if you override the settings on your laptop, the school will know it, for one. Could take the laptop away 2. Can you access the administrator account Nope. You cant install programs, delete programs, or access any administrator functions. 3. Ubuntu Linux is a WHOLE NEW ballgame. It isnt anything like Windows, and isnt supposed to be. Its like comparing Apples to Oranges. I cannot get the bell to stop ringing after a 3 to 5 seconds. I know it is something simple that I am not doing, but I have tried everything that. I cannot get the I know it is something I am trying to program our Intermatic ET70215C for our school. I need to set the school bells at various times.

Trained Certified system technicians and experience sales staff can design and support your communication system. From the MCS350 system to the top of line StarCall with VoIP interface GE Dukane and Newtech systems can meet your communications needs.

These functions are initiated from any one of up to three MCS350T or four MCS350 Administrative Control Consoles ACCs that can be connected to the system. The entire system of ACCs and up to 240 MCS350T or 256 MCS350 remote stations are controlled by a GE Model MCS350T or MCS350 Central Control Unit CCU. Twoway open voice communications can be initiated from an ACC to any remote speaker station or to another ACC. Paging and program distribution can also be initiated by an ACC to any one station or group of remote stations. The builtin master clock can be programmed to control time tone distribution to any or all remote stations. The master clock can correct selected synchronous clocks or selected digital clocks. The clock has battery backup to maintain correct time for seven days after power loss. The MCS350T System also allows most DTMF telephones to access the communications channel for twoway open voice communications and paging. DTMF telephones

can call any ACC or talkbackcapable remote station in the system and make zone, all call, or emergency pages. DTMF telephones can also initiate manual time tones and a custodial call tone, and have last number redial capability. This layered solution means you won't be shoehorned into a system that can't keep pace with the needs of your building, and you won't find yourself rattling around in a system heavy with costly features that go unused. It also means there is always a clear and cost-effective migration path to higher-end features and increased capacity, should building expansion or changes in occupancy warrant an upgrade in the future. Regardless of the StarCall feature set, your communications and timekeeping system will incorporate the very latest technology in a powerful package engineered to deliver exquisite performance, and built to provide reliable services even in the most demanding settings. Others, like higher education, businesses, and healthcare facilities, prefer digital versions.

GE Security clocks are styled to be simple, clearly visible, and neutral to their environment. Architects and engineers will appreciate their adaptability. GE Security clock systems deliver the accuracy, choices, convenience, styling, and unique features that your facility is looking for, all at a price you can afford. Easily send live or prerecorded messages to a single zone within a facility or broadcast to multiple locations across a district. Enhanced by industry-specific software and modular feature expansion, the platform is ideal for Educational, Healthcare, Commercial and Correctional facilities. Nakamura Tw 10 Programming Manual. We have received overwhelming responses from our customers for the product and our support. Dukane 4A3610B Pdf User Manuals. View online or download Dukane 4A3610B Operation Manual. In 2002 Dukane sold the Communications Systems Division CSD which produced the SmartSystem Smart System, StarCall, NurseCall nurse call, assisted living products, amplifiers, pagers paging, PA systems, clocks, multi-tone generators and intercom. I would also like to personally thank my area representative, Kevin Patrick, for his quick response on any issues I come up with. Kevin has always made himself available at the drop of a hat, whether for a customer demo or site visit. Once again thank you and we look forward to the future with your company.
