A fő ok az hogy bekapcsolt állapotban nehezen jön elő az OSD. Bebe villan mikor indítja a kazit befúzi szépen és teker is. Viszont se hang se kép se OSD. Kazi ki akkor kiírja nincs kazetta. Magyarul visszajön az OSD !!! Meg nem volt ilyen hibám evvel a típussal. Valakinek van 5 lete. Playre pontosan 11 mp-ig működik addig minden jó, majd megáll és kidobja a kazettát, és lekapcsolja a TV-t. Elejibe azt hittem TV tap hiba, de a TV működik ha nincs bekapcsolva a VHS resz, meg ha kazetta nélkül berakom infraszenzor eltakarásával akkor is megindul mivel nem forog majd kidobja és kikapcsol. Mivel nincs LED je amivel a hibat jelezne így kikapcsolással jelzi a hibát, mert ezután nem lehet visszakapcsolni csak aramtalanítással. Ha csak bent van a kazetta STOP akkor nem jelentkezik a letiltás hiba. Ha tekerem előre FWD vagy hátra REW akkor összesen megy kb 20 mp-ig. Ilyenkor megindul tekerni majd atvált szupergyors tekerésre, majd 5 mp múlva atvált újbol lassu tekerésre, majd hibával kidobja a kazettát és lekapcsol. Program forgokapcsolot megtisztítottam. Infra adobol 2 db van az oldalon hogy a kazetta bent vane, 1 db infra hogy forog a lukas fogaskerek, es ezekre 1 db prizmával kozositett infra vevo dioda, ezek mind jok letakarva ellenoriztem. Capstan motoron van egy hall szenzor azt nem neztem meg, nemtudom hogyan ellenorizhetnem le. Mas szenzort nem latok, nedvessegszenzort sem szaraz minden nem az hibazna. Annyit tudok meg hogy a tv resze az Funai TV2000 mk12. Nem tudom mi nem tetszik neki, mert kapcsol ki. Similar manuals You can write in English language into the forum not only in Hungarian. You need the manual that came with remote. Inside you should be able to find your brand of DVD player and the codes to activate it. Since all Universal Remotes are different there's no set procedure that will work for all of them.

You will need the manual and go through each step to set up correctly. If you don't have or misplaced manual, you might need to contact manufacturer to either replace manual or receive the codes. Clock had a mind of its own, eventually completely packed up reading any type of disc after 13 months.I've had philips tellys for years, in fact the one in the main bedroom I had when I was at uni and that's 15 years ago!!! Still works fine. Jeepers that makes me feel old!!! I have had one of these machines for just over a year and it has never worked correctly. Will record a

programme and on playback will give up after 38 minutes every time, constantly freezes up and has to be turned off and on at the mains. I never use it now, its so unreliable I have given up on it. I have updated the software as advised on the Philips website and it has not helped. Buy only if you want to spend 50 for a silver box to sit under the telly.

Personally, Id get a few more pounds together and buy something else. Was very annoying, and now its being used in the kids room as a simple dvd player. Also bought a Philips DVDR65 i think its called, was useless too. Seems like luck of the draw if you get a duff one or not. Gave up the ghost after about 15 months. Didnt recognize discs and came up with an error when recording anything. Called Philips who said it was just a coincidence. Looked on ebay recently and there were loads for sale on there with the same problems. Never any problems.
