Discussion threads can be closed at any time at our discretion. The 20foot 6.1m system input cable connects the module to your surround receiver see Figure 6. The system input cable has a multipin connector on one end and several wire pairs on the other. Each wire pair is marked on the cable jacket with RIGHT, LEFT, CENTER, RIGHT SURROUND, LEFT SURROUND, or CENTER SURROUND to indicate where each wire connects to the receiver. CAUTION Before making any connections turn off your receiver and unplug it from the AC mains outlet. Not doing so may result in damage to your system. Tighten the two thumbscrews to assure a secure connection. Connect each wire pair on the other end of the system input cable to your surround receiver. Note The RCA plug of the system input cable comes with a cover installed. CAUTION Do not allow exposed wires to brush against each other; this could damage your receiver.Each wire pair is marked on the If your receiver has no. Vanessa 4.0 out of 5 stars I agree with most reviewer that the price is too high, but I think the quality is great. I actually have a 6.1 receiver that hooks

these speakers up and the additional Bose center speaker. I've had these for 3 years and they worked great, even after 3 different moves across the country. I have almost everything hooked up by fiber optics to my receiver for the best possible quality. <http://andaautoparts.com/upload/comtrend-ar-5381u-manual.xml>

Trust me there is a difference between, optical and analog quality and it's obvious whenever I listen or play something on TV. Even still to this day when I watch a movie or play a video game I swear I'm hearing something outside or in the house, but it's just the sound from the speakers. I got mine there and it was cheaper and tax free. Please try again later. Please try again later. Jeff 4.0 out of 5 stars The quality and sound reproduction is without equal in everything but the very best home theater. Through all this time I have never heard one crackle from any of the speakers and often times at full volume. Right now I'm driving the system with an Onkyo TXSR608 and I mean drive. Jason 5.0 out of 5 stars UFC 58 was intense! the living room in my place is about 20 feet by 15 feet so these 5 speakers jammed into that area makes everything sound awesome. Please try again later. Please try again later. SD 5.0 out of 5 stars If you want similar performance and nice look Virtually invisible yes, Bose is the way to go. I hooked up this to my Yamaha RXV 1500 THX Receiver. It shakes. This is definitely NOT Radioshack quality. Please try again later. Please try again later. Avidal 5.0 out of 5 stars Please try again later. Please try again later. Lone Ranger 5.0 out of 5 stars Please try again later. Please try again later. Victor M. Mitri 1.0 out of 5 stars I have integrated it with Yamaha Receiver AV771, and did the setup using automatic and then manual channel setup, using best results for the room layout. What's wrong with the system No middle range frequency, voices is distributed into 3 categories low, middle and High frequency, where human ears can hear anything between 20hz up to 22 Khz divided on the frequency range above. Thanks mean, you will hear the High frequencies e.g. Woman sounds, Jet sounds, and low frequencies from Subwoofer Bass, but all middle frequencies will be chopped and thrown away.

Middle Speaker does not have a cross over and the only solution is to buy and VS10 speaker by USD 170.00 to fix this issue. Subwoofer has very limited control over the sound, you are transferring the sound from the AV receiver to Subwoofer through a special cable, therefore the amplifier is not doing its job, result is very limited control and fine tuning. When you listen to the audio output of the system you will say hell it's loud, but loud is not good at all. So people who don't know about audio and can afford it, it's a good solution. A bit pricey for something that only sounds decent but that is how to get the best out of a Bose system. I hope I can save someone out there some money. Don't buy into the hype that Bose is the best. This heightened experience in music and motion picture listening is largely aided by a powered Acoustimass module for exceptional sound that appears to come only from the small speaker arrays. Imagine your favorite movie with Bose 5.1 surround sound. Footsteps on the sidewalk behind you. A flute playing to your left. Voices, front and centre. And the horizontal centrechannel speaker keeps dialogue focused on the screen and complements flatpanel TVs. Powered Acoustimass module adds drama to music and movies. Downwardfiring drivers and proprietary technology deliver the lowest audible notes and effects with clarity and balance. Horizontal centrechannel speaker array visually complements flatpanel TV screens while delivering naturalsounding dialogue and vocals. Acoustimass speaker technology enables powerful lowfrequency effects. Place the module almost anywhere in your room and all the sound appears to come from the cube speakers. Automatic protection circuitry prevents drivers from being overdriven and provides increased reliability while minimising interference with the listening experience.
