Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with brooks stair lift instruction manual . To get started finding brooks stair lift instruction manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

brooks stair lift instruction manual

That way, your Brooks or Acorn Stairlift User Manual is always easily found whenever you need it. With Budget Stairlifts Scotland, our aim is to make this possible in the most costeffective way for you, whether it's for a new or Secondhand Stairlift. Read our Customer Testimonials to learn how we've helped others. We look forward to helping you too. The upper and lower charge points and upper and lower stopping limit ramps are installed on the rail sections at the factory. Retighten the pinch bolts to hold the jointbar securely in place, using 2 x 10mm spanners. Replace the screw into the gear rack and back into the upper rail. Insert plastic end pieces to Rail top for Carriage installation. Hold down seat switch, and drive Carriage onto Rail using a remote control. Remember to remove the plastic end pieces from the top of the rail. Remove the footrest hinge cover by removing the screw. To remove main cover, remove the 2 screws that are located along the front bottom edge. Adjust the seat to the correct angle by placing a spirit level on the seat post platform. Once level, tighten the bolt back up. Return the footrest hinge cover by replacing the screw. Carry this out as follows Fold up the seat arms and seat base. Fit Seat Index Plate Cover. Ensure that all wires are clear and will not become trapped. Run the stairlift back to the top of the stairs and check to see if the footrest is level with the landing. If not, repeat until correct. Adjust the clearance between the stairlift and the wall by moving the rail in or out appropriately. Ensure that the transformer wire is neatly routed so it will not cause a tripping hazard or get caught by the moving stairlift. Plug in the transformer only. By releasing the button the stairlift will stop travelling. Pressing the RED button on the remote and the stairlift will travel in upwards. By releasing the button the stairlift will stop. The LED display should show and the stairlift will not operate. http://ecohouse-lab.com/userfiles/cummins-6bta-5_9-m3-service-manual.xml

Digital fault codes The Acorn and Brooks straight stairlift displays a series of Stairlift fault codes. These fault codes are for diagnostic purposes. They help the user or stairlift engineer quickly identify the current status or potential problem. This is especially useful when trying to explain over the phone to a Stairlift engineer exactly what has happened or gone wrong with the lift. Using these informative codes enables the Stairlift engineer to quickly diagnose the exact cause of the fault or issue. In many cases they can be used them to resolve the problem over the phone. This saves the user money by not having to pay for a callout. How to use the Stairlift fault codes The very first versions used a series of traffic light coloured led's to display the fault codes. These were quite hit and miss, especially when the led's became loose or desoldered from the circuit board in the arm. Also, when carrying out a Stairlift service, these are invaluable for determining whether individual safety circuits are working correctly or not. T498 Display Code Description Possible Fault BLANK Power down Check battery isolation switch is in the on position 0 Batteries Low Batteries 17v or less 1 Normal If there is a toggle fault, try a remote handset 2 No charge, audible bleep Transformer unplugged, lift not on charge point, or power cut 3 OSG Handwind stairlift clockwise to reset 4 Seat turned Seat not in travel position, safety arm if fitted not down 5 Key off Turn key on 6 Final limit Overrun. Handwind stairlift up or down slightly 7 Footrest down Lower safety edge activated 8 Footrest up Upper safety edge activated 9 Carriage up Upper safety cover activated A Carriage down Lower safety cover activated C Batteries flat Leave on charge for approx 1 hour E Brake fault Try reset. Possible low batteries. Leave on charge F Motor Try reset. Call engineer U Relay fault

Carry out reset. This enabled a greater list of stairlift fault codes to be used.

These gave a more accurate display in real time of the stairlifts current status. Activate toggle switch to wake A1 Normal No charge. Lift will beep Check mains is on.
