Try our troubleshooting guides and machine manuals below, which offer solutions to the most common issues. If you're still stuck, view our extensive list of FAQs at the Brother Solutions Centre. Our support app is only a click away, so download today. If it has, raise the feed to ensure the fabric will move forward. Computerised machines will remind you to do this. This will switch the machine back to Rethread the machine following the threading instructions in your machine's instruction manual. You will also find instructions for your machine online via the Brother solutions centre Note We find that Butterfly and Singer Branded needles are often not compatible with Brother sewing machines and may cause issues with your machine not picking up lower thread. We would recommend using either Organ or Schmetz branded needles. Rethread the machine following the instructions in your manual and ensure that the foot is raised. If there is tension when pulling the thread, then the thread may be unsuitable for machine sewing and should be replaced with machine sewing thread from a reputable brand. It's possible there be a timing issue with your machine. Contact your Brother dealer to arrange a service or contact our customer service team. Make sure the presser foot is lifted before threading the machine. Set your bobbin correctly into the machine. For top loading bobbins, the thread needs to be going around the bobbin in an anticlockwise direction. Use the guides on your machine or refer to your instruction manual. If you have a mechanical machine, check that the foot is lowered before sewing. Computerised machines will remind you to do this. Using thread that does not pull through smoothly can cause thread breakages, poor stitching or damage to your machine. For best results, you should use a good quality, branded thread. The thread should pull through the machine with no tightness. The current link to the user manual for the XL3520 is. I hope this helps. Cindy WellsHow do I get one Actually, when you enter CXL you get the XL50 users manual, which is essentially the same machine, although a few of the patterns may be different. The CXL, XL50, XL10 and XL1 are basically the same machine; I own a CXL and XL50, and love them. They can sew SIDEWAYSstraight AND zigzag stitch!I suggest you call to any shop selling and ask how to fill bobbin of a brother sewing machine, they will give you a demo as you would need one.I want to use the button holer but dont remember how and am not even sure that Im attempting to use the right foot. Answer questions, earn points and help others. Always unplug this sewing machine from the electrical outlet immediately after using and before cleaning.

**IMPORTANT** If the available socket outlet is not suitable for the plug supplied with this equipment, it should be cut off and appropriate three pin plug fitted. It is located between the foot controller and the power supply plug on the cord. 2. Connect the power supply plug into a wall outlet.

**CAUTION 1. SNAPON TYPE 1.** Raise the needle to its highest position by turning the balance wheel toward you counter clock wise and raise the presser foot lever. 2. The stitch selection dial may be turned in either direction. All stitches are preset in width, therefore, the stitch length is the only other necessary adjustment. The numbers marked on the Stitch length dial represent the length of the stitch in millimeters mm.To sew forward, release the Reverse Sewing Button. The machine will

then sew forward. Reverse sewing is used for backtacking and reinforcing seams. Turn the bobbin clockwise, by hand, until the spring on the shaft slides into the slit on the bobbin. 5. While holding the end of the thread, gently de press the foot controller to wind the thread around the bobbin a few times. With your right hand, turn the balance wheel toward you counterclockwise until the needle moves down and back up again to its highest position. You can use the same color or two different colors of thread for making decorative stitches. Any of the patterns, except the buttonhole pattern, can be sewn with the twin needle. It may need to be adjusted when you change fabric or thread type. NOTE It is recommended that a test sample be made on a fabric scrap before sewing on your project. Possible misadjustments and their results. Set the Pattern Selection Dial to 1, 2 or 12 for the type of Straight Stitch required. Use the Blind Hem Stitch 6 for any nonstretching fabrics and the Stretch Blind Stitch 7 for stretch fabrics. Each is explained below. Set the Pattern Selection Dial to 10. MENDING 1. Set the Stitch Length Dial between F and 2.5. 2.

The Triple Zigzag Stretch Stitch can also be used as a decorative top stitch. Set the Pattern Selection Dial to 11. It is recommended that pins be placed across both ends of the buttonhole as protection against cut ting the stitches. When sewing the right side of the zipper, attach the shank to the left pin of the zipper foot. EMBROIDERING 1. Stitch the outline of the design by moving the embroidery hoop. 2. Performance Checklist Whenever sewing difficulties are encountered, re view the section in this instruction manual that details the operation you are performing to make sure you are correctly using the machine. Page 16 Page 15 Upper thread Lower thread tension is too. It may become necessary to reship the sewing machine. Improper packing or improper packing material could result in damage during shipping. Instructions for repacking the machine are illustrated below.
