This machine scans faxes into memory immediately after you press the start button, THEN dials out, so if you have more than one fax to send to different places, you do NOT have to wait for the first fax to send before you go on feeding the other pages through. What a wonderful feature to have after so many years of not. This fax machine is on a dedicated fax line, not hooked up to our computer system, and has been a wonderful addition. Absolutely zero regrets on buying this Brother fax. Is a real workhorse without no jams, down time or trouble of any kind. Great machine. Pros Laser so faxes are crisp and clear and cost to operate is really cheap. No problem with operation, worked for 2 years on project with several thousand faxes. Can do one touch faxes or group send, all the features you would want. Cons I cant think of any, it worked in a very dirty environment, dusty construction site and is still working. Brother has great prices on their cartridges, these machines are easy to operate, the printout quality is really good. We would recommend them without reservation. After upgrading my laptop, I cant print to this unit any longer. One of them always pulled multiple sheets of paper and jammed when receiving faxes or printing copies. After replacing just about every roller in there, it worked for a few months, and now its back to jamming again. The other fax was more reliable until just a month ago, when recipients began complaining of a black stripe down the side of their fax. We followed Brothers recommendations and cleaned various parts inside, but the only thing that fixed it was unplugging and pluggings back in the power. Even then, it was only a temporary fix. Maybe I just got a bad batch of these, but I would suggest caution before buying one. In order to navigate out of this carousel please use your heading shortcut key to navigate

Since they are easy to use and maintain, a fax machine is still a solid investment for your business. Setting up your IntelliFAX machine should take only a few minutes. 1 Determine where you want to place the fax machine. It needs to be close to a phone jack and an electrical power source so that you can power it on and connect it to a working phone line. 2 Remove the drum from the packing materials and rock it back and forth six times. This will spread the toner inside the unit. 3 Take the yellow insert from the drum. 4 Open the front cover of the fax machine and place the drum into the fax. It will snap into place. 5 Insert the document tray into the tabs on the front of the fax machine. Insert the document support into the tabs on the top of the fax machine.

6 Take the paper cassette out of the fax machine, and then adjust the paper size tabs in the cassette to the proper size for your paper. 7 Add paper to the cassette and insert it back into the fax machine. 8 Plug the power cord into the wall outlet and the fax machine. 9 Insert the handset cord into the fax machines handset and the handset jack on the rear of the fax machine. 10 Insert one end of the phone cord into the wall jack. The fax machine rings twice if you have a voice call coming in. Tips Information in this article applies to Brother IntelliFAX 4100 and 4750e models. Multiple users can easily share the benefits of this laser fax machine.

Its innovative design incorporates a high capacity, frontloading paper tray that simplifies paper handling, and a high monthly duty cycle, geared for departmental support. Fax throughput is optimized with a modem capable of transmitting as fast as 3 seconds per page, or of slowing down automatically to communicate with slower machines. A highcapacity, frontloading paper tray is easily accessible and reduces the time spent reloading paper. An optional second tray allows you to load letter paper in one, and legal in the other so that incoming faxes print automatically on the correct paper. A number of features combine to save you time, including the ability to autodial up to 132 numbers, or to simply scan a fax once and then automatically broadcast it to as many as 182 recipients. Whether printing incoming faxes, or using the 30page auto document feed capacity to make copies at up to 15cpm, you can expect, crisp, clear, professional output every time. The availability of a highyield replacement toner cartridge contributes significantly to lowering your operating expenses, making this a particularly economic fax solution. Your investment is protected because we've built in both USB and parallel interfaces that enable this model to serve as a laser printer up to 15ppm if your needs grow beyond basic fax and copying.
