The large, 15" color monitor instantly displays 3, 4 or 6 channels and freeze frames for detailed reviewing and printing. Request a quote or learn more about the Burdick Quest System by contacting an Avante equipment specialist today. Dedicated serial RS232C for TM55 or TM65; Bike Dedicated serial RS232C for Treadmill Burdick supported bicycle ergometer Learn more. Its not possible to upload the service manual here. Its in pdf format.. Inparticular, I need the schematics for the circuit boards I was wondering if you ever received the board schematics you were looking for I have. For that i need your email id. OK Answer questions, earn points and help others. We have replaced the queue sensor, the intermediate pcb on the printhead assembly and also the stress interface pcb, but the problem persists. The paper roller is undamaged and appears in good condition. Paper type is correct and works fine on our other Quest system. Looks like a software problem, but service manual no help and there seems to be no tech support for Burdick equipment after the takeover from Cardiac Science. Dont really want to swap the hard disk from our working system in case it goes belly up too anyone got any bright ideas Have you tried mechanical parts,gear,rollers etc. You can try Swaping the whole printer module for your problem. Best of luck Sajeev Also know there is a brand new never used system but without monitor at Huddersfield General hospital perhaps Contact Brian at the EBME departmenthe may be able to help. The hospital awere trying to sell it. Do you have a copy of system software QNX and its installation manual. Regards Sajeev But the system is not accepting the touchscreen, ie its showing some nos are scrolling on the screen when connected is there any chance of getting the software reloaded into the system or the driver for the monitorreinstalled in the system thanks. This minute change helps to Thousands of clinicians worldwide rely on the TM55 and TM65 to deliver the accuracy and reliability required for All ExTOL systems feature your choice of one of our two sophisticated multichannel electrocardiographs, an easyto operate monitor and the whisperquiet T600 treadmill. The versatile Burdick ExTOL Exercise Stress Systems can also provide sophisticated resting ECG technology and a comprehensive array of stress testing capabilities. Features The hyperbolic workload control provides consistent patient workload regardless of pedaling speed. Features. Try selecting a smaller quantity. Everything you need to see is directly onscreen. Performs both resting 12lead ECGs and stress tests on one system. Accurate ECG data acquired at the patient, eliminating noncardiac electrical noise. Generous storage, enhanced online data editing and several data management options. Full range reporting

offers over 15 different report configurations.

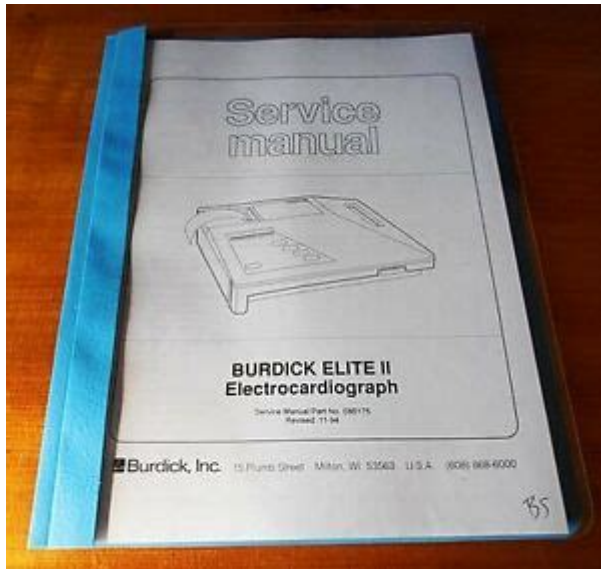

<http://www.drupalitalia.org/node/76862>

It is specifically designed to be the most intuitive system available. Critical information is kept readily accessible with minimal operator interaction. This allows you to conduct most of the test right from the touchsensitive monitor while remaining focused on the welfare of the patient. Select final reports which best accommodate your procedures. Acquire resting supine ECG printouts. Save final reports digitally for future referral. Unlike many products which are developed with the aid of outside consultants, this program was developed in the environment for which it is intended. Several criteria for abnormalities are age, race and gender dependent. Race, for example is key in identifying hypertrophy and Twave abnormalities. Powered by Adrecom s ecommercePlease try again Please try again. Everything you need to see is directly onscreen letting you focus on the patient. It is a sophisticated stress testing system in an easytouse, intuitive format and a product of Burdick's commitment to innovation and customer satisfaction. Bank Loan vs. Cash All shipments are packed securely. Please note that for international sales we only accept a bank wire transfer to our account. We are proud to state that our repeat customers are our best references and are available upon request. The system is easy to use because it features a touchscreen with convenient pulldown menus for intuitive workflow. We put everything you need on one screen, so there's no need for toggling among screens. And to save you time, we added an easy way to correct unintentional phase changes without having to start all over again. We offer several styles and affordable price points across our many product category groups, plus, we also offer expert diagnostic and repair services on medical equipment, too. Twenty years of consistent performance and quality customer service for our clients in Florida, the U.S.

Will keep tabs on everything in a baby's diaper down to two grams. Its lightning quick digital readout keeps messy job time to a minimum. And it is as easy to clean as it is to store. SECA 728 INFANT SCALE 851 Digital Diaper Scale SECA 345 INFANT SCALE Capacity 33 pounds. From the integrated digital display to the unique tray design, this baby scale has it all. With the seca 231, the scale becomes a complete weighting and measuring station. Rugged steel construction and cast levers ensure years of durability and accuracy. Removable tray makes transport and cleaning simple and convenient. Although its weighing tray is designed to be far more generous and comfortable than other models, at only 7 lbs itself, it requires amazingly little space. Has a large, clear LC display and practical handle, which can also be used to hang the scale. This innovative device converts from an infant scale to a toddler scale in one simple step. Lightweight, multipurpose and batteryoperated, it is perfect for the medical office or home health environment. Well suited for heavy usage. With the baby ruler, this scale becomes a complete, economical, spacesaving, weighing and measuring system. Displays weight in brilliant green digits. Weighs in pounds or kilos at the touch of a button. Measures infants length with builtin tape measure. Lockin weight stabilization makes it easy to weigh even the most active baby. Capacity is 350 lb x 4 oz 160 kg x 100 grams. The displays on top and back make for easier reading and an RS 232 PC interface allows direct transfer of information. Height rod can be attached. Utilizing the unique TARE feature, the practitioner can secure the infant's weight while still being safely held. Aluminum construction assures durability. Provides more comfort, to meet the patients demands. A slipresistant, heavyduty, castiron base, eliminating the need for a mat. Classic body design and white color with innovative features. Offers long life and a fiveyear warranty.

Height rod included. The large round dial makes for easy and convenient weight reading. Castors are included. Constructed of anodized aluminum making it rust and scratchresistant. The waisthigh digital scale is constructed of anodized aluminum with a white finish for both looks and function. With its accuracy and durability, it will perform capably in a fitness or weight loss center's rigorous setting. Easy to operate, stylish and priced just right. The platform's precision sensor activates the scale and the automatic shutoff adds extra convenience. Battery operation and low power consumption make this the perfect portable scale. Rear wheels provide easy mobility. Just three seconds later the emeraldcolored backlit display shows the measured weight. When the scale is left, the display is automatically reset to zero. An integrated telescopic rod provides enhanced durability. The display is positioned for the practitioner's view and is battery operation for portability. It's extralarge LC display and autohold function means that on the seca 841, you can always see the weight quickly and accurate to the gram. With its longlife batteries, wheels and motherchild TARE function, the uniscale offers total mobility plus over 80,000 carefree weighings for infants, toddlers and adults. Its design was based on a lower profile and wider platform. Its rugged allmetal body is

enhanced by a heavyduty lever system. The remote head and handle make the BMI easy to operate and move. No one offers a more complete line of medical weighing and measuring instruments. No one offers more stateoftheart digital products for medical professionals either. "Others" may try to pass off "repurposed", outofdate technology as their newest answer to the needs of the medical community. We also offer full line support as well. Top quality marketing materials coupled with responsive after sale service. Find out why seca is the fastest growing scale company in America today.

The quicktouch turn on and longlife batteries offer the utmost in operational ease. Combine the large LC display and activation sensor with the convenient TARE function and you have the seca multipurpose uniscale at your feet. Can be used in relatively small spaces on carpet or tile. Lift away arms for easy patient transfer; lift away footrest and oversized wheels for maneuverability. Compact design and locking wheels make the chair maneuverable. Has swiveling armrests for easy seating and the desirable TARE function for taking out extra weight. Ambulatory patients hold padded handrails during weighing for added security. Digital display rotates for wide angle viewing. It has a preselector for critical values involving high fluid turnover and dialysis and compact load sells. With integral handles, it can be manipulated quickly and practically. Unaffected by power supply fluctuations or electromagnetic fields, and has an automatic fail safe system. As many as six bases per indicator may be used, each with their own preset value. Display dot matrix plasma. Thanks to the extremely flat platform, the scale is easy for wheelchairusers to mount and the side barriers ensure maximum safety. The integrated preTARE function determines the patient's net weight in seconds and a real advantage is its HOLD function, which continues to display weight in large, easytoread numbers even after the scale is no longer in use. This scale can be folded up in just a few moves and its transport castors make it easy to move. Can be transformed into a complete measuring and weighing station with the addition of Seca 242 or Seca 222 measuring rod options. Integrated lifts allow four measuring platforms to be placed under the castors of the bed. The previously determined weight of the bed is tared using the preTARE function and the patient's precise weight accurately determined.

The bed scale stores all the previously determined values and retains the information in the event of a power failure using rechargeable batteries. Packed in clear plastic pen barrel with color coded top. DETECTO PATIENT LIFT SCALE DIGITAL Designed for patient weighing when used with the PL425 Patient Lift and PL450 Sling Seat. Powered by one 9V battery. Locking rear casters and base widening stance provide maximum safety. Adjustable weighing arm and hydraulic lift mechanism. Optional 115 VAC power adapter. Call your representative for additional product answers. WELCH ALLYN PRO 3000 INSTANT THERMOMETER Provides new measurement technology, ergonomic design, built in crosscontamination safeguards, wide range of patient temperature, fast, accurate and durable. Provides 8 temperatures scanned in less than a second for delivery of an accurate temperature in just one second. Probe cover sensor reminds operator to use a new probe cover. Ergonomic design gives a smaller profile and is more comfortable to hold. It is the instrument of choice for military and sports medicine, research, firefighting, rescue or any outside activity where thermoregulation function could be at risk. The kit includes waterproof carrying case, 500 disposable probe wraps, neckstrap and spare battery. Last reading memory. Safer than glass thermometers. 200 hours battery life. Accurate to ASTM 1112 standard. Two year limited warranty. These instruments feature a patented automatic emissivity compensation system for absolute accuracy regardless of skin type or color. This series consists of four models, each optimized to the specific application by probe design. In those applications where crosscontamination is an issue, the use of disposable wraps or sheaths allows even moist or wet tissue to be measured with precision

accuracy.

Especially recommended for use in plastic and vascular surgery, pain management, rheumatology, neurology, anesthesiology, oncology, and of particular interest in wound management, especially as used in diabetic neuropathy. 104900 104910 104920 104950 DT1001Dermatemp Surface Skin Scanner DT1001LN Dermatemp Surface Skin Scanner DT1001LT Dermatemp Surface Skin Scanner DT1001RS Dermatemp Surface Skin Scanner DIGITAL THERMOMETER Accurately records body temperature in 60 seconds. Audible beep signals peak temperature. A replaceable battery provides 200 hours of use. Each package comes complete with thermometer, 5 probe covers, battery, storage case, instructions, and one year limited warranty. Protected by a three year warranty. TAT5000HP Thermometer Designed for patient use at home, one year warranty TAT5000 Thermometer This series is recommended for use in officebased practices, ambulatory care clinics, pheresis and blood donor units, and extended care facilities. Features a stainless steel probe head for optimal durability. This model requires the use of disposable covers. It is protected by a three year warranty. TAT5000 Thermometer exceeds the requirements of officebased practices, ambulatory care units, including pheresis and blood donor units, and for use in extended care facilities. Rugged enough to be protected by a Lifetime Warranty. Audible "beep" alerts operator when temperature is complete. Bold LCD display for easy reading. Operates on two 3V lithium batteries. Made of FDA approved, virgin polyethylene. Secure fit. Ejects easily after use. Features include large LCD display, temperatures in F0 or C0, last temperature recall, and a standard 2 year warranty. Operates on 3 AAA batteries included. Measures from 840F to 1080F. Automatically determines level of inflation according to the users systolic blood pressure and arm size, and adjusts to accommodate changes in blood pressure between readings.

Extra large LCD panel registers blood pressure and pulse at the same time. Luminescent dial for visibility in low light conditions. Lifetime calibration warranty. Contemporary Eurostyle black casing complements any decor. Rear mounting bracket doubles as an inflation system storage compartment. Includes all necessary hardware and instructions. Available in wall mount or mobile configurations. Includes an ABS cuff storage compartment in main unit. Navy blue nylon DRing selfadjusting cuff for onehanded cuff application. Latex inflation bladder and bulb. Chrome plated deflation valve. Diaphragm only blood pressure scope with black PVC tubing. Complete with leatherette zippered carrying case, operating instructions and blood pressure recording charts. Gray cotton cuff with artery label and gauge holder. Complete with leatherette zippered carrying case and operating instructions. Precision crafted 300mmHg nopin stop German mechanism tested to 200,000 cycles. Mechanism housed in a patented double shell ABS impact polymer casing. Ambidextrous infinite control trigger release air valve. Quick release luer slip connector. Six clinical cuff sizes available. Dip molded inflation bladder withstands heavy use. Complete with leatherette zippered carrying case with nylon zipper. Assembled, inspected, and packaged in the U.S.A from foreign components. Two year inflation system warranty. Color matched spraguetype stethoscope. Calibrated nylon cuff. Latex bladder and bulb. Chrome plated valve. Rugged gauge features precision crafted German mechanism housed in a patented double shell ABS impact polymer casing. Ambidextrous trigger release air valve. Quick release luer slip connectors. Assembled, inspected, and packed in the U.S.A. from foreign components. Frontmounted basket stores cuff and 8 coil tubing. Deluxe latex inflation system with calibrated nylon cuff. 4.2 mm glass tube with 300 mm Hg scale. Bold, black gradations on white faceplate.

Tubing connector at 3 o'clock position for easy cuff change. Longlife, calibrated nylon cuff with artery label. Latex inflation system. Standard air release valve. Navy blue nylon Dring selfadjusting cuff with attached blood pressure scope for onehanded use. Navy blue nylon cuff with range markings to facilitate selection of correct cuff size; artery label and gauge holder. So you're sure to enjoy a fast return on investment, in terms of both income and patient health. We're here to help you

make a difference. For your patients. And your practice. Since 1915, Welch Allyn has been committed to developing some of the most innovative diagnostic instruments for the medical community. Ultimately, the Welch Allyn name means better instruments for physicians everywhere. And that translates into better health for every patient. Striking black finish complements any decor. Graduated unbreakable plastic cartridge tube recessed for safety features 5.00mm inside bore for unrestricted, frictionfree mercury flow. Locking reservoir secures mercury during transport or maintenance. Complete with vinyl coated wire cuff basket, 8 ft length when extended of coiled tubing, all mounting hardware and comprehensive owners manual. Assembled, inspected and package in the U.S.A. Two year inflation system warranty. Lifetime warranty on cartridge tube. 952B00 952BLF 952BCLF 952BXLF 952BC 952DBBLF Manometer Only Adult, Black, Latex Free Child, Black, Latex Free Large Adult, Black, Latex Free Child, Black, Latex Adult Cuff System, Navy, Latex Free 509802 509818 WELCH ALLYN CLASSIC HAND ANEROID Unsurpassed accuracy and durability in the traditional classic design. For more than 30 years, the Tycos Classic Hand Aneroid has delivered performance and reliability in worldwide clinical use. Precision, jewelled bearings resist wear for consistently accurate readings. Every dial face is individually laserengraved for exact calibration.

Crisp white graphics on large charcoalgray scale for better readability. Unique phosphorbronze aneroid bellows ensure consistent pressure measurement. Recessed dial brings needle and dial markings close together and eliminates parallax. Singletube leur connector allows for easy interchange of cuff sizes. Lifetime calibration and manufacturing warranty. Quiet operation. Large, easy to read display panel. Includes zippered carrying case. WELCH ALLYN CLASSIC POCKET ANEROID Provides protection to the manometer during the rigors of clinical use. Gauge attached to cuff protects instrument and prevents cuff and gauge from being easily separated. Laserengraved dial for precise calibration. Unique phosphorbronze bellows ensure consistent pressure measurement. Crisp, white graphics on large charcoalgray scale for better readability. Lifetime warranty on calibration and manufacturing quality. All latex free. 509001 509002 509003 509006 509014 509022 509037 509041 WELCH ALLYN ECONOMY ANEROID Tycos quality and accuracy in an affordable cuffmounted system. Five year warranty against manufacturing defects. Luminescent dial features bold white numerals and extended graduation marks on contrasting black face. Cuff includes convenient gauge holder. Assembled, inspected, and packaged in the U.S.A. Two year inflation system warranty. Latex free units are completely free of any latex. Luerlock permits quick interchanges among various cuff sizes. Trigger deflation valve provides smooth onefinger control of pressure deflation. Large, easytoread dial face. Doubleshell ABS housing delivers durability and protection to internal movement. Balanced ergonomic design fits and functions comfortably in either hand. Builtin stethoscope chestpiece allows for clear detection of blood pressure sounds with minimal training. Easytouse trigger deflation valve provides smooth release of air pressure. Dring cuff for convenient selfapplication. Laserengraved dial face for precision calibration.

Builtin basket for securely storing the inflation system. Highimpact housing and bezel to protect the movement and crystal. Precision, jeweled bearings resist wear for consistently accurate readings. Visual check of accuracy on the dial. Strong diecast zinc internal housing protects mechanism. Easywrap cuff is ideal for arthritics. Large, easytoread digital display. Compact and portable, travels anywhere. Latexfree materials. Extra large LCD readout. Automatic deflation valve. Automatic poweroff conserves battery life. Calibrated tube is thoroughly annealed glass. End faces are flame glazed to prevent chipping. Permanent numerals on black anodized scale are easy to read. Large diameter mercury reservoir. Large bore 5 mm calibrated tube prevents separation of mercury reading.
