Please check your inbox, and if you can't find it, check your spam folder to make sure it didnt end up there. Please also check your spam folder. This manual covers all localities where the products are sold. For this reason, there may be information in this manual that does not apply to your locality. When changes occur in applicable products or in the contents of this manual, Canon will release technical information as the need arises. In the event of major changes in the contents of this manual over a long or short period, Canon will issue a new edition of this manual. Under the copyright laws, this manual may not be copied, reproduced or translated into another language, in whole or in part, without the written consent of Canon Inc.http://homenet-spb.ru/userfiles/drake-ps7-service-manual.xml

3 While pushing down the release tab, pull the toner cartridge out in the direction of the arrow in the illustration below.

4 Rock the new toner cartridge five or six times to distribute the toner evenly inside the cartridge.

⚠ WARNING
Do not throw used toner cartridges into open flames, as they may ignite the toner remaining inside the cartridge, and result in burns or a fire.

◯ IMPORTANT
If the toner is not distributed evenly inside the cartridge, the printing quality deteriorates.

Therefore, the operations of the microprocessors used in the machines are not discussed they are explained in terms of from sensors to the input of the DC controller PCB and from the output of the DC controller PCB to the loads. Normally i.e., unless the machine is in a sleep state, the machine will be supplied with power when you turn on its main power switch. For details, refer to the Users Guide. The service engineer should instruct the customer to clean the machine at regular intervals once a month. If black streaks are seen on the printed paper, clean the fixing pressure roller in the user mode. Be sure to clean the fixing pressure roller after replacing the toner bottle. The machine will start cleaning the fixing pressure roller. If the reverse side of the printed paper is stained, clean the transfer roller in the user mode. Cleaning will start. If this symptom occurs, clean the internal roller in the user mode. Cleaning will start. It may cause explosion. It tends to react easily. A laser scanner mounted on the machine is sealed with the protection housing and external cover to prevent the laser beam from leaking to the outside. The laser beam never leaks out of the scanner as far as users operate the machine normally Aus diesem Grund ist das optische Lasersystem mit einem Schutzgehause und einer Auenabdeckung dicht verschlossen und hat eine Struktur, die keine Laserstrahlen nach auen dringen lasst. Unter der Voraussetzung, dass der Benutzer dieses Gerat normal bedient, ist ein Austritt von Laserstrahlen daher ausgeschlossen. These regulations apply to laser products manufactured on and after August 1, 1976, and the sale of laser products not certified under the regulations is banned within the Untied States. The label shown here indicates compliance with the CDRH regulations, and its attachment is required on all laser products that are sold in the United States. If you must detach a cover showing the label, be sure to take extra caution during the work.

The slowdown is reduced with the following user mode.The slowdown is reduced with the following user mode. Please check your inbox, and if you can't find it, check your spam folder to make sure it didnt end up there. Please also check your spam folder.
