In this version we made player improvements to make watching them even better. Why is it so difficult for you guys to add the option to read viewer written reviews which are available only through using the browser version of Netflix? At times it seems like Netflix has some type of agenda to limit the chances of any of their productions from getting any kind of negative or honest viewer feedback. And one of the biggest actions Netflix did to prove my point is making the ridiculous and obvious mistake of getting rid of the 5 star review system which helped fine tune which movies were recommended for us. Some of us like my entire family for example had each perfectly fine tuned the movie recommendation algorithm after working hard to submit honest ratings for every single Netflix streaming movie we'd watched for multiple years (since Netflix first started offering its streaming service). And then without even asking for its customers opinion on the matter it just gets rid of the entire rating system and implements the useless thumbs up or down rating! If Netflix ends up falling from the heights it's reached it will only be because of their lack of common courtesy and respect towards its customers feedback. Ok! the app and selection of shows and movie is AWESOME and AmAZing I love that your coming out with twilight but the problem is you take off shows that are adored for example Pretty little liars it made me really sad and angry that y'all took this off because I just got into it and I couldn't watch it all and now I can't find any app to watch it that my mom will pay for and since I'm 14 I'm a kid so it's not like I can get anything for myself so it was really a disappointment and it was an even bigger disappointment when you took off Winx club Rai you had almost all the seasons and took all of them off except season 7 which now I have to watch it all online and finally you took off Pokémon and power rangers mega force and Lab rats and Charmed like seriously those shows I adored and now I can't watch any of those it's super disappointing and you took off My babysitters a vampire the movie which helps to understand the series which I think is a huge mistake cus now nobody will know what it's truly about and how it started and it's RIDICULOUS and last then you took off was girl vs monster now I know many don't know of it but it was an Awesome movie that both me and my cousins enjoyed and would watch over and over like you took so much off for grown up shows like what about us kids and teenagers what about the things that aren't boring / I love Netflix and admittedly have things streaming far too often throughout the day. Everything works beautifully and it's easy to search for what you're looking for and the list of saved shows is fine too. My big issue, however, is with the currently watching area on the tv app, phone app, and website. Sure there are tons (and I mean TONS) of articles all over the web giving instructions on how to remove shows from the currently watching section that you no longer want to view, but Netflix it's your job to provide an easier method for doing this. It's unrealistic to expect people to go into their history and delete a millions episodes of a show just to get to the movies and whatever other shows they need to remove from that section. Just allow a space on the titles to remove them from that area. Especially for shows or movies that you try out and end up not liking. They stay there for months! Also, the app on tv plays the show or movie just when you're trying to read the info about it and guess what?? That also adds that title to currently watching! Fix this issue please! It's 2020! We shouldn't have to google the hundreds of articles teaching people how to get around your archaic ways with this one thing. Do better, Netflix.
