## Dividing mixed fractions printable worksheets pdf

Credit: Shutterstock Once your child enters first and second grade, you can reinforce basic measurement skills with these free worksheets. She'll get practice measuring in inches, centimeters, feet, yards, cups, quarts, and pints. Color by number worksheets are a great way to teach your kids or students basic number recognition, how to use a legend, and it will give them the opportunity to work on their fine motor skills. There are tons of color by number worksheets below overall different sorts of themes. No matter what the kids are interested in, they are sure to find a color by number here that they'll love to tackle. Scroll further down the page and you'll find some free, printable color by calculation worksheets that will help your child or student practice their math facts. In addition to these color by number worksheets, there are some great places they can go on the computer to play free color by number online games. If your kids love these free color by number worksheets, be sure to check out some other free printable activities for kids including connect the dots worksheets, hidden pictures, and printable mazes. Subtraction is a key skill to learn for young students. But, it can be a challenging skill to master. Some children will require manipulatives such as number lines, counters, small blocks, pennies, or even candy such as gummies or M&Ms. Regardless of the manipulatives they might use, young students will need lots of practice to master any math skill. Use the following free printables, which provide subtraction problems up to the number 20, to help students get the practice they need. D.Russell Print the PDF: Worksheet No. 1 In this printable, students will learn basic math facts answering questions using numbers up to 20. Students can work the problems on the paper and write the answers just below each problem. Note that some of these problems do require borrowing, so be sure to review that skill before handing out the worksheets. D.Russell Print PDF: Worksheet No. 2 This printable gives students further practice solving subtraction problems using numbers up to 20. Students can work the problems on the paper and write the answers just below each problem. If students are struggling, use various manipulatives—pennies, small blocks, or even small pieces of candy. D.Russell Print the PDF: Worksheet No. 3 In this printable, students continue to answer subtraction questions using numbers up to 20 and noting their answers just below each problem. Take the opportunity, here, to go over a few of the problems on the board together with the entire class. Explain that borrowing and carrying in math are known as regrouping. D.Russell Print the PDF: Worksheet No. 4 In this printable, students continue to work basic subtraction problems and fill in their answers below each problem. Consider using pennies to teach the concept. Give each student 20 pennies; have them count out the number of pennies listed in the "minuend," the top number in a subtraction problem. Then, have them count out the number of pennies listed in the "subtrahend," the bottom number in a subtraction problem. This is a quick way to help students learn by counting real objects. D.Russell Print the PDF: Worksheet No. 5 Using this worksheet, teach subtraction skills by using gross-motor learning, where students actually stand up and walk around to learn the concept. If your class is large enough, have students stand at their desks. Count the number of students in the minuend, and have them come to the front of the room, such as "14." Then, count the number of students in the subtrahend—"6" in the case of one of the problems on the worksheet—and have them sit down. This provides a good visual way to show students that the answer to this subtraction problem would be eight. D.Russell Print the PDF: Worksheet No. 6 Before students begin to work the subtraction problems on this printable, explain to them that you'll give them one minute in which to work the problems. Offer a small prize to the student who gets the most answers correct within the timeframe. Then, start your stopwatch and let the student loose on the problems. Competition and deadlines can be good motivational tools for learning. D.Russell Print the PDF: Worksheet No. 7 To complete this worksheet, have students work independently. Give them a set time—perhaps five or 10 minutes—to complete the worksheet. Collect the worksheets, and when the students have gone home correct them. Use this kind of formative assessment to see how well students are mastering the concept, and adjust your strategies for teaching subtraction if needed. D.Russell Print the PDF: Worksheet No 8 In this printable, students will continue to learn basic math facts answering questions using numbers up to 20. Since the students have been practicing the skill for a while, use this and the subsequent worksheets as time-fillers. If students complete some other math work early, give them this worksheet to see how they perform. D.Russell Print the PDF: Worksheet No. 9 Consider assigning this printable as homework. Practicing basic math skills, such as subtraction and addition, is a good way for young students to master the concept. Tell students to use manipulative they might have at home, such as change, marbles, or small blocks, to help them complete the problems. D.Russell Print the PDF: Worksheet No. 10 As you wrap up your unit on subtracting numbers up to 20, have students complete this worksheet independently. Have students swap worksheets when they are done, and grade their neighbor's work as you post the answers on the board. This saves you hours of grading time after school. Collect the graded papers so you can see how well the students have mastered the concept. Find more math practice for your first graders with these word problem worksheets. There are over 100 free fraction worksheets in PDFs below to support the many concepts encountered with fractions. When starting with fractions, begin by focusing on  $1/2$  and then a  $1/4$  before moving to equivalent fractions and using the 4 operations with fractions (adding, subtracting, multiplying and dividing) These worksheets require students to find a half using circles, squares, rectangles, sets of objects e.g., one-half of 12 cookies, one-half of 14 chocolates etc. Worksheets to find  $1/4$  of sets and of shapes. Beginning to look at 8th's, 6th's by dividing the circle into equal parts. Eight Pizza Worksheets to show the toppings by fractional amounts. Helps to keep learning about fractions fun and authentic. Worksheets to Add Fractions with Common Denominators Use these worksheets before having students add fractions without finding common denominators. Additional practice. 6 Worksheets to subtract fractions with a common denominator. Students are required to find the common denominator prior to adding. These worksheets require students to take fractions like  $18/12$  and reduce them or simplify them to  $6/4$  and on to  $3/2$  and on to  $1\ 1/2$ . Students are required to take fractions like  $3/12$  to  $1/4$ . Finding equivalent fractions is key. Students need to find ways to see that  $2/4$  is the same as  $1/2$  and will benefit from having hands on activities. Worksheet for mixed fractions Tutorial included These worksheets all see the connection between fractions and decimals. Can students apply what they know? Use these fraction word problem worksheets. Multiplying, Division, Addition, Subtraction etc Geography worksheets can be a valuable resource for teachers and students looking for activities and information related to both U.S. states and foreign countries. Each link leads you to a page featuring general background about the subject, whether it be countries like Germany and Japan, or states like Alaska and Nevada. The resources also include crossword puzzles, vocabulary worksheets, alphabet-ordering activities and explanations of geographical terms—such as isthmus, island and archipelago. Use these printables as study aids, pop quizzes or launching points for discussions about the various states and countries included here. Add these free printable geography worksheets to your homeschool day to reinforce geography skills and for variety and fun. Geography Germany Japan South America These fraction worksheets are suitable for grades 4, 5 and 6, depending on the expectations or standards and developmental levels. There are two types of fraction identification: one where the student will shade the portion of the fraction and these, which require the student to identify the fraction by looking at the shaded part of the whole. Fractions are one of the most difficult concepts for students to understand. These worksheets can be used as summative or as diagnostic tests to determine the level of understanding students have. Or, teachers can assign them as homework or for-in-class work. The free printables offer a variety of concepts related to fractions involving all operations, multiplying, dividing, adding, and subtracting, as well as understanding common denominators. A worksheet or test is provided in each section for students to complete followed by an exact replica of the PDF containing the answers for ease of grading. Worksheet 1. D. Russell Print the PDF: mixed operations and compare the fractions This test or worksheet provides fraction problems involving mixed operations, requiring adding, subtracting, multiplying, and dividing. If you are using this printable as a test, you'll find out whether students understand when they need to find a common denominator before working the fraction problems. If students are struggling, explain that when the denominators—or the bottom numbers—are the same in two fractions, they only need to subtract or add the numerators or top numbers. When the fraction problems involve the operations of multiplying and dividing, students don't need to find the common denominators; in those cases, students can just work the problems. Worksheet 5. D. Russell Print the PDF: multiply the fractions, equivalent fractions Before students begin working the fraction problems on this worksheet, explain to them that "of" in math means times (x). So, for one of the problems on the PDF, students will determine what is the product of  $1/3$  of 8. They can work the problem as follows:  $1/3$  of 8 = ?  $1/3 \times 8 = ?$   $1/3 \times 8 = 8/3$   $8/3 = 2\ 2/3$
